Minutes of the Suffolk County Sewer Agency
Meeting of May 19, 2008

The meeting was called to order at 11:04 am by Gil Anderson, P.E., Commissioner of DPW and Chairman of the Suffolk County Sewer Agency. In attendance were Jeff Szabo, Deputy County Executive & Chief of Staff, representing County Executive Levy, Legislator Brian Beedenbender, Chairman of the Legislative Public Works and Transportation Committee, Justin Littell, representing Legislator D'Amaro, Tom Isles, the Suffolk County Director of Planning, Michael Cavanagh, Legislative Aide to Presiding Officer Lindsay, Vito Minei, P.E., representing the Commissioner of the Department of Health Services.

Also present were Linda Spahr, Esq. of the Department of Law, Ben Wright, P.E., Chief Engineer of the Sanitation Division, John Donovan, P.E., Adam Santiago aide to Legislator Beedenbender, Geneen Fogarty, and Craig Platt, Secretary to the Sewer Agency.

Note: Project representatives are shown on the copy of the sign-in sheet attached at the end.

Welcome by Commissioner Anderson to the April 21st meeting of the Suffolk County Sewer Agency, and introductions by Roll Call.

Roll Call: All members (or representatives) present.

Minutes from SCSA for March 17, 2008, were discussed.
A motion to accept the minutes was made by Vito Minei and seconded by Commissioner Anderson Motion passed 5-0-2 (Tom Isles and Justin Littell abstained).

Commissioner Anderson stated that he received a request from an individual to address the Agency on the Formal Application for the SD# 13 Windwatch Application for Expansion. The Commissioner asked that the project be moved to the last item on the Agenda as to give the individual time to make an appearance to address the Agency.

A motion was made by Mike Cavanaugh and seconded by Commissioner Anderson to move the Application to the last item on the agenda. Motion passed unanimously.

Public Portion: *There were no requests to make statements.*

See the attached sign-in sheet for additional attendees

Old Business:

HU-1040 **110 Sand and Gravel**

Ben mentioned that this is a landfill on 130 acres off of Park Place in Melville. They are an existing contractee authorized to discharge 70,000 GPD into SCSD #3 – Southwest. The company plans on expanding and requires additional gallonage (30,000 GPD). Ben further mentioned the application was tabled at the last SA meeting due to the need for company to submit an application to the SCDHS and that shortly after the last meeting the application was submitted. Ben did want to highlight though, as he did at the last meeting, that DEC has increased its scrutiny as far as the county requesting additional connections from outside the SD boundaries. There is no reason to think that the request will not be approved but there is some scrutiny and it is included in all the resolutions and resolve clauses of the legislature.

Commissioner Anderson asked if a representative form the applicant was in attendance and Jason Golden and James Debis replied that they were and that Ben had stated their request correctly and that they were just looking for additional gallonage.

Commissioner Anderson asked if the board members had any questions and Tom Isles replied that he did. Tom asked if the point Ben made concerning the DEC providing extra scrutiny – if it was related to the capacity issues at Bergen Point and the question of the additional 5 million gallon expansion. Ben replied that in 2006, the influent loadings were above the design loadings. Even thought the plant produced excellent effluent quality the county had to certify that they exceeded the design loads. Because the county had initiated an expansion project the DEC allowed the county to proceed with the connections.

Tom further asked if the project is for construction, demolition, debris and was told the he was correct. Additionally, Tom questioned the 6th resolve clause. The clause refers to the company offering to dedicate the facility to the agency for the collection system onsite and that refers to a previous collection system onsite. Tom questioned if it was standard language and Ben replied in the affirmative.

Jeff Szabo made a motion to approve the application, was seconded by Justin Littell. Motion passed unanimously.

SUFFOLK COUNTY SEWER AGENCY

RESOLUTION NO. 10 - 2008

AUTHORIZING AN INCREASE IN FLOW FROM 110 SAND CO. (HU-1040) TO SUFFOLK COUNTY SEWER DISTRICT NO. 3 - SOUTHWEST

WHEREAS, **110 Sand Co**. is an existing NYSDEC licensed landfill located on Park Drive in Melville, New York, on property identified on the Suffolk County Tax Map as District 0400, Section 254.00, Block 02.00, Lots 044.000, 047.001 & 048.001 and Section 265.00, Block 01.00, Lots 001.000, 009.004 & 009.008 (the "Premises"), and

WHEREAS, the Premises are not located within the boundaries of Suffolk County Sewer District No. 3-Southwest (the "District"), or within the boundaries of any other municipal sewer district, and

WHEREAS, **110 Sand Co**. is authorized to discharge seventy thousand gallons per day (70,000 GPD) to the Districts facilities, and

WHEREAS, **110 Sand Co**., due to the proposed expansion of the landfill service, will generate an additional sewage flow of thirty thousand gallons per day (30,000 GPD) (the "additional flow "), and

WHEREAS, the owner of **110 Sand Co**. has applied to this Agency for permission to connect the additional flow from **110 Sand Co**. to the sanitary sewerage facilities of the District, and

WHEREAS, the District's sewage treatment plant has sufficient capacity to accept the additional flow which is expected to emanate from **110 Sand Co**., and

WHEREAS, the connection of the additional flow of **110 Sand Co**. to the District will be financially beneficial to the District, and environmentally beneficial to Suffolk County,

NOW, THEREFORE, IT IS

1st RESOLVED, that **110 Sand Co**. be permitted to connect the additional flow to the sanitary sewerage facilities of the District, upon such terms and conditions as the Administrative Head of the District may impose, subject to the terms and conditions hereof, and it is further

2nd RESOLVED, that a total of one hundred thousand gallons per day (100,000 GPD) of capacity in the District's sewage treatment plant be allocated to **110 Sand Co**., and it is further

3rd RESOLVED, that the additional flow authorized herein is subject to the approval of the Suffolk County Legislature and the New York State Department of Environmental Conservation, and it is further

4th RESOLVED, that the additional flow authorized herein is subject to the execution of an agreement (the "Connection Agreement") between the developer of **110 Sand Co**., the District, the Suffolk County Department of Public Works ("DPW"), the Suffolk County Department of Health Services, the County of Suffolk and this Agency, which agreement shall contain such terms and conditions as the Administrative Head of the District shall determine, and it is further

5th RESOLVED, that the connection fee of $30.00 per gallon per day (a total of $900,000) to be paid for **110 Sand Co**. shall be paid upon the execution of the Connection Agreement, and it is further

6th RESOLVED, that **110 Sand Co**. shall use its existing collection system which was previously built by **110 Sand Co**., and has previously offered to dedicate the said facility to this Agency, or to this Agency's nominee, at no charge, and it is further

7th RESOLVED, that this resolution shall become null and void, and of no further force or effect, without any further action by this Agency or notice to the developer of **110 Sand Co**. if, within one (1) year from the date of the adoption hereof, an agreement in furtherance of the authorization granted herein (the Connection Agreement), in form and content satisfactory to the Chairman of this Agency, has not been negotiated and fully executed by all parties thereto.

(Sewer Agency Meeting May 19, 2008)

New Business:

DURYEA RESIDENTIAL DEVELOPMENT HU1521

Ben mentioned that this is a proposed 36 unit PRC w/clubhouse on a little more than 5.5 acres in Melville. It will generate 5,463 GPD of flow. Conceptual Certification was given in 2005 and Formal approval in 2007. The connection agreement was not executed within the one year window. Staff recommended the extension of time be granted. Additionally, as the previous agenda item, with reference to the DEC the same comments apply.

Commissioner Anderson asked if a representative from the applicant was in attendance and John Armendral, Farrell Fritz and Gregg Schiavone, RMS Engineering replied they were and had no comments.

Commissioner Anderson asked if the board members had any questions and Tom Isles replied for clarification; that the county has a law requiring a certain percentage of units be set aside as affordable and that this project's approval predated the county law.

Motion to approve made by Commissioner Anderson and seconded by Legislator Beedenbender, motion passed unanimously.

SUFFOLK COUNTY SEWER AGENCY

RESOLUTION NO. 11 - 2008

AUTHORIZING AN EXTENSION OF TIME FOR THE COMPLETION OF THE CONNECTION AGREEMENT TO SCSD #3 – SOUTHWEST FOR DURYEA RESIDENTIAL DEVELOPMENT (HU-1521)

WHEREAS, on April 16, 2007, this Agency adopted Resolution No. 7-2007, authorizing the connection to SCDS #3 - Southwest by **Duryea Residential Development**, and

WHEREAS, Resolution 7-2007, granted a one year time for completion of the Agreement, but the year has passed without the completion of the Agreement, and

WHEREAS, negotiations concerning such an agreement are complete, and a proposed agreement has been prepared and is in final form, and

WHEREAS, the developer of **Duryea Residential Development** has requested an extension of the authorization granted in Resolution No. 7-2007,

NOW, THEREFORE, IT IS

1st RESOLVED, that Resolution No. 7-2007, adopted by this Agency on April 16, 2007 is hereby renewed, and it is further

2nd RESOLVED, that this resolution shall become null and void, and of no further force or effect, without any further action by this Agency or notice to the developer, if, within one (1) year from the date of the adoption hereof, an agreement in furtherance of the authorization granted herein, in form and content satisfactory to the Chairman of this Agency, has not been negotiated and fully executed by all parties thereto, and it is further

3rd RESOLVED, that the additional flow authorized herein is subject to the approval of the Suffolk County Legislature and the New York State Department of Environmental Conservation.

(Suffolk County Sewer Agency Meeting 5/19/08)

New Business:

Other:

Ben Wright stated that the staff wanted to advise the Agency members that the developers for the potential expansion of SCSD #7, Twelve Pines and SCSD #20, Ridgehaven had been notified that the projects fall under recently enacted New York State Labor Laws Prevailing Wage laws.

SD 13 WINDWATCH **IS-0201.1**

Ben mentioned that this project been here many times and has received different degrees of approvals and the ultimate goal of the project is to expand the SCSD #13 Windwatch from 400,000 GPD to 750,000 GPD. That final approval was not granted by all the interested parties and at the last meeting the issue of prevailing wages as well as the need for legislative approval was brought up and a new application has been submitted which will increase the capacity from 400,000 to 750,000 GPD and will proceed through the steps necessary for all approvals. Ben stated for clarification that the project description in the agenda referred to an application to connect prior to the expansion of the plant, when in fact there was no application submitted.

Commissioner Anderson stated that he was aware that the representatives from the applicant were present. Eugene L. Wishod identified himself as the attorney for Motor Parkway Associates (MPA). Mr. Wishod introduced Ross Cassatta, a members of Motor Parkway Associates LLC, Stephen Hayduk, the project engineer, and Herb Balin, the attorney representing the Holliday Organization, one of the proposed connectees. Mr. Wishod stated that in the second paragraph of the project description sheet where it referenced that there are five developments with agreements to connect that there actually are six, five of which have agreements.

Holiday Organization 47,500 GPD,
Hauppauge Green which 8400 GPD
Townhouse Village North 30,000 – 35,000 GPD
Townhouse Village South 30,000 – 35,000 GPD
Care Matrix -15,000 GPD.

Commissioner Anderson asked if the board members had any questions and Legislator Beedenbender inquired as to the next step in the process and was told that the application had to be approved by the legislature and that at the last SA meeting the issue of prevailing wage had been settled.

Commissioner Anderson made a motion to approve, was seconded by Vito Minei. Motion passed unanimously.

SUFFOLK COUNTY SEWER AGENCY

RESOLUTION No. - 9 2008

AUTHORIZING THE EXPANSION OF THE SUFFOLK COUNTY SEWER DISTRICT NO. 13 - WINDWATCH SEWAGE TREATMENT PLANT BY MOTOR PARKWAY ASSOCIATES

WHEREAS, this Agency has previously approved the expansion of the facilities of Suffolk County Sewer District No. 13 - Windwatch (the "District") by 350,000 gallons per day to meet the then known needs of projects in the vicinity (SC Sewer Agency Resolution No. 41-2005), and

WHEREAS, the District's sewage treatment plant (the "Plant") lacks sufficient capacity in excess of the needs of the District to accept the sewage which is expected to emanate from various projects, and

WHEREAS, Motor Parkway Associates, in contract with the various projects has offered I at its sole cost, expense and effort, and at no cost to the ratepayers of the District, to expand the Plant in order to provide sewage treatment capacity for the projects, and

WHEREAS, the agreement to expand the facility by 350,000 gallons per day was not executed within one year of the adoption of the Sewer Agency resolution 41-2005, and

WHEREAS, the connection of the various projects to the Plant will be financially beneficial to the District and environmentally beneficial to all of Suffolk County,

NOW, THEREFORE, IT IS

1st RESOLVED, that Motor Parkway Associates is hereby authorized to enter into and upon the site of the District's sewage treatment plant for the purpose of expanding the said plant by three hundred fifty thousand gallons per day (350,000 GPD) in order to provide sewage treatment capacity for the various projects, and it is further

2nd RESOLVED, that the said expansion of the Plant shall be performed by Motor Parkway Associates at no cost to the ratepayers of the District, and it is further

3rd RESOLVED. the said expansion to the Plant by Motor Parkway Associates shall be performed in accordance with the requirements, and to the satisfaction, of the Suffolk County Department of Public Works, and it is further

4th RESOLVED, that in consideration of the expansion of the Plant by Motor Parkway Associates, each of the various projects shall receive a credit against the connection fee payable to the District for the connection of each of the projects to the sanitary sewerage facilities of the District, and it is further

5th RESOLVED, that the Administrative Head of the District is hereby authorized to enter into an agreement with Motor Parkway Associates, the District, the Suffolk County Department of Public Works, the Suffolk County Department of Health Services the County of Suffolk and this Agency for the expansion of the District's sewage treatment plant in order to provide sewage treatment capacity for the various projects, said agreement to contain such terms as the Administrative Head of the District shall determine, and it is further

6th RESOLVED, that Motor Parkway Associates shall post a surety bond and deposit cash or security with the Suffolk County Treasurer as the Administrative Head deems necessary, as security for Motor Parkway Associates' expansion of the Plant as well as for all of Motor Parkway Associates' obligations under the aforesaid agreement and it is further

7th RESOLVED, that, upon the completion of the expansion of the Plant by Motor Parkway Associates, the connection of each of the projects to the sanitary sewerage facilities of the District shall be subject to the approval of this Agency the Suffolk County legislature and the New York State Department of Environmental Conservation and it is further

8th RESOLVED, that this resolution shall become null and void, and of no further force or effect, without any further action by this Agency or notice to Motor Parkway Associates if within one (1) year from the date of the adoption hereof an agreement in furtherance of the authorization granted herein (the Construction Agreement), in form and content satisfactory to the Chairman of this Agency, has not been negotiated and fully executed by all parties thereto.

(Suffolk County Sewer Agency Meeting 5/19/08)

Commissioner Anderson stated that the agenda was concluded.

Tom Isles stated that he had a question for the first item on the agenda; he asked if the corporate ownership of 110 Sand & Gravel had changed since 2004? Jason Golden stated that it had not.

Commissioner Anderson made a motion to close the meeting the motion was seconded by Legislator Beedenbender and passed unanimously.

Meeting adjourned at 11:18 AM

A moment later Legislator John Kennedy arrived and apologized for being late that he had been detained at a meeting. He mentioned that he had telephoned and would be there to address an item before the Agency on behalf of constituents in his legislative district.

11:20
Commissioner Anderson made a motion to reopen the meeting, was seconded by Justin Littell and approved unanimously.

Legislator Kennedy stated that his purpose for addressing the Agency was regarding the application for Motor Parkway Associates and the expansion to 750,000 GPD of SCSD #13. He had been approached by two of the entities that were identified for connections in the previous Construction Agreement (Spring Meadow and Townhouse Villages). His constituents were part of the original agreement from 2001. Legislator Kennedy asked the board to consider that there may be an alternative to achieve connection on behalf on some of these existing entities, with failing STP. He further stated that his constituents had been waiting eight years for relief. Furthermore he stated that SCSD #13 had a 400,000 GPD capacity and that only 200,000 GPD were used. He asked the board to consider connecting both developments. He asked if the data submitted in 2000 or 2001 was still the data relied on to make current decisions with regard to this issue. Mr. Kennedy stated that once again he had taken up everybody's time and apologized asking the board to at least take into account these issues when making a decision.

Commissioner Anderson stated that Ben did raise the issue of connection by one of the smaller plants, one of the smaller facilities – Spring Meadow – although Ben did note that no formal application has been made yet from them to connect directly into it.

Legislator Kennedy responded that one of the reasons that they have not done so is that they are a small co-op; residential, primarily senior citizens and single families. For the past eight years they relied on MPA to do the expansion.

Commissioner Anderson responded that in all fairness to MPA that they have made considerable effort. Eight years ago was the initial application. There has been a protracted time period going from conceptual to final and now to again the final

approval, the final - final approval if you will. The staff has been in discussion with Spring Meadow. Commissioner Anderson further the Agency had given approval based on final documents being prepared and agreed to by the Division of Sanitation.

Legislator Kennedy asked if the documents were contemporaneous.

Commissioner Anderson responded that they are at least from 2005. Ben mentioned that the DEC approval was from 2007.

Ben mentioned that part of the discussion today was that it started seven or eight years ago but that flow had changed– and as the flows change the characteristics of the plant change and as bids were taken there was a necessity to look at cost of saving measures reducing not reducing but changing the type of equipment, etc. that's used at those plants - so that necessitates the change in the engineering report, plans and specs. So they were updated. He further mentioned that probably within the past six months was the last time the reports were sent to the DEC. SCDPW and the SCDHS had to approve the documents for the 750,000 GPD expansion even though that was at the beginning of the application process.

Legislator Kennedy further stated that he was trying to look at the issue from the perspective of his constituents and that they are experiencing increasing hardship.

Ben mentioned that going back 2001, that the statement was made that once construction is initiated DPW would deal with trying to hook up Spring Meadows, the other one would have to go through a pumping station. The SCDHS has consent orders with both of those facilities and they are basically failing. The commitment to an early connection if construction had to start and DPW was convinced that it was going to lead to an expanded facility.

Discussion ensued concerning excess capacity at the plant. The question was asked; If currently the plant is approved for treating 400,000 GPD yet the flows show only it treating 200,000 GPD, why isn't the excess available?

John Donovan mentioned that 200,000 GPD of flow that the plant receives daily is less than the committed capacity. Ben reiterated that there is only 30,000 GPD remaining of capacity and it is committed to Computer Associates. Furthermore John stated that the plant should be seeing about 350,000 GPD but we're only seeing 200,000 GPD to 250,000 GPD and that extra 100,000 GPD is not something can be given away because it is a strength issue. Flow usually dilutes the strength. Usually we see higher strength because of low flow fixtures in this particular design. The reason the SCDHS and SCDPW look at that is one of the reasons we planned meeting the plants flow requirements. We see higher strength which consumes extra capacity in the plant. We see 350,000 GPD at a higher strength equates to a flow of 400,000 GPD. Engineers do constantly try to get extra flow and submit documents and sometimes we can squeeze out some capacity and still meet limits. So part of what is there -there isn't 100,000 GPD to be given away or not being used. It is being used in a strength condition not in a flow

condition. So basically the only available capacity is 30,000 GPD Computer Associates has in reserve. John stated the he wanted to clarify that that it's not as simple as there's less flow so we can use extra. It's really not available. On paper everybody has an allocated amount.

Ben mentioned that in legislation enacted two years ago, when the connection fee was brought up that it was added to the law that capacity is not just hydraulics but it's a mass loading in the strength because of this issue has been raised time and time again.

Legislator Kennedy asked if anyone had contacted Spring Meadow or made contact with their engineer they've retained, at least to advise them. At this point Mike Chiarelli identified himself as the engineer for Spring Meadow and the Townhouse Condos. Mike stated that he was an observer at the meeting relative to the Windwatch project.

Commissioner Anderson stated that the next step in the process is to go to the legislature for approval. Once the legislature and County Executive have given the approval, the Construction Agreement can be completed. Once the construction starts, we can entertain having Spring Meadow connect to our plant because we will have already approved the expansion. It may be a matter of two months or so. It will certainly seem quicker to me to go through this process rather than Spring Meadow applying to the Agency for connection.

John Donovan added that Spring Meadow has approved plans to build their Pump Station and connect to Windwatch just waiting for this part of it to go forward so they can execute that once like the commissioner said, this is approved.

Stephen Hayduk mentioned that the plans and specs for job are approved. That bids have been received. The construction phase will be ready when the administrative things are complete.

Legislator Kennedy requested that the board allow Spring Meadow to go ahead and connect at this time.

Vito Minei stated that they (Spring Meadow) should bring it (their concerns) here. It's one thing to call you John; it's another thing to bring if formally to the Sewer Agency for our consideration. We could do it, I mean off hand, I'm not in favor of individual connections when we have the opportunity of this consortium to get one opportunity going in and at one point in time they obviously made the financial decision that this was in their interests, but they could always bring it to the Health Department directly or DPW directly or to the Sewer Agency and I haven't heard from them. There is so much good being accomplished here although not as timely as some people would want. I mean you know getting rid of older facilities, bringing in new facilities. We have a county run facility and our evaluation is that county run facilities happen to be the best run facilities. Investigated issues like flooding and things like that you know it's location near other residence, there's so much good going into this. We trust over a 35 year period that with Ben Wright and the engineering reports it wouldn't hurt from this point

forward, hopefully we'll have more of these connections and we've done it in the past where we have a summary report of the flows involved any administrative issues and any outlined technical issues that need to be addressed I would like to see this from this, I'm just personally familiar w/a number of these facilities but my point to you Leg. Kennedy, if they have an issue, if they're reconsidering their agreement they should let us know directly, not thru your office. I mean they have opportunities; they have a legal instrument in place they should let us know.

Commissioner Anderson made a motion to close and was seconded by Legislator Beedenbender. Motion approved unanimously.

Meeting adjourned at 11:42

Respectfully submitted,

Craig A Platt
