Will all Legislators come to the horseshoe? Okay, if could all rise for the salute to the flag led by Legislator Muratore.

# **SALUTATION**

It's so good to see you looking so well, Tom.

### LEG. MURATORE:

Thank you.

# **PUBLIC PORTION**

# **CHAIRPERSON HAHN:**

Okay. We will begin with the Public Portion. Our first -- each speaker has three minutes. You can come to the podium and our first speaker is John Turner followed by Gwen O'Shea.

#### MR. TURNER:

Good morning, Chairwoman Hahn and members of the committee. My name is John Turner and I serve as a conservation policy advocate for the Seatuck Environmental Association, which you may know is a not-for-profit conservation organization located in the wonderful County Scully Preserve down in Islip, where we advocate for wildlife protection and provide education programs. I'm here today to express the organization's strong support for the adoption of a resolution, Introductory Resolution 1291, which relates to the land across the street basically, the 6.6 acre property, two parcels owned by Janice Bradt.

These parcels, while they may be small in overall acreage, have really great ecological and water quality or hydrological significance in that they are key components of the very headwaters of the Nissequogue River. This river has two major headwater systems, one that starts Townline Road, almost in the Town of Islip, and flows north all the way through Millers Pond County Park into Blydenburgh and then works its way not too far from here. And the other system to it, a tributary, is much shorter and it really starts right over here and then flows into Blydenburgh. I'm not sure it's an artesian system or if it's just flow that comes out of the hillside, but if you walk the property, which I have done several times with County officials, you literally see the water bubbling up, and because of that, the area is really dominated by various wetland species. It's just a really important area.

You've already acquired one parcel to the east; the Town of Smithtown in years past has acquired two. There's the third parcel that you're negotiating in that they're very close to reaching an agreement on. So when it's all said and done, government, both the County and the Town of Smithtown, will have done a really bang up job in terms of preserving an assemblage of open space that really will lock away and preserve, again, the headwaters to one of the two headwater systems of the Nissequogue River. So, again, for those reasons we urge that you adopt the resolution today.

10:06AM 30

10:07AM 40

10:08AM 50

```
5/8/2017 EPA Committee
          CHAIRPERSON HAHN:
          John, do you mind staying where you are? We have some questions
       2
          from Legislators. Legislator Krupski.
       3
          MR. TURNER:
          Sure.
          LEG. KRUPSKI:
          Good morning, John.
       9
10:08AM 10
          MR. TURNER:
      11
          Hi.
      12
      13
          LEG. KRUPSKI:
      14
          Is this -- I'm only familiar with it because I've seen it from the
      15
          highway there.
      16
      17
          MR. TURNER:
      18
          Yeah.
      19
10:08AM 20
          LEG. KRUPSKI:
      21
          Is this an area that should be -- is it a water quality issue?
      22
          know there's a lot of development all around it. Is there
          anything, impaired water, the surface water that's draining into it
          that needs to be remediated or is this, in fact, already protected
          from that sort of impact.
      27
          MR. TURNER:
      28
          I would defer to County officials to talk more about the water
      29
          quality impacts. My understanding is in years past there had been
10:09AM 30
          some concern about contamination that had been flowing, I guess
          from past, you know, legacy land use or dumping that may have
          impacted the area at very low levels, very low concentrations.
          think that that's been remediated and is no longer an issue, but
          I'm not 100% sure.
      35
      36
          LEG. KRUPSKI:
      37
          Thank you.
      38
      39
          CHAIRPERSON HAHN:
      40
          Thank you. Our next speaker is Gwen O'Shea.
      41
          MS. O'SHEA:
      43

                          I'm Gwen O'Shea with the Community Development
          Corporation of Long Island, and I thank you for the opportunity to
      45
          speak with you this morning. For those of you that are not familiar with CDCLI, we are a non-profit organization that has been
          serving Long Island since 1949 and we really are a significant
      49
10:10AM 50
```

force for revitalizing and building strong communities, because at the core of what we do we believe that home matters for all individuals. So our mission is to invest in housing and economic aspirations of individuals and families by providing solutions that foster and maintain vibrant, equitable and sustainable communities. And so assisting Long Islanders by providing safe, affordable housing is at the core of what we do, and that's really why we are

so pleased to partner with Suffolk County on Resolution 1262, the

Septic Program.

So our role through a one million dollar commitment from Bridgehampton National Bank, we will be able, based on our experience in doing a number of these projects, will be lending to individuals who are interested in participating in the program but may not have the resources, the disposable income to make that So residents who are interested but are unable to cover the difference of the grant from the County can apply on their own. They're not forced to, but they can voluntarily decide to participate in this program that will be made available to them once they start the application process with the County.

So I want to underscore the importance of this program being made

application can simultaneously pre-qualify. We will not start the

verify that the homeowner qualifies based on the County's criteria

to participate in the program. So if a homeowner does qualify and

the County does allow them to move forward with a grant, it will take no more than five business days for the individual to be able to access this and be informed that they have all the resources

I want to underscore the importance and really commend the County

dollars that the County is bringing to this program, we're bringing over 1.6 million to cover the administrative cost and underwrite the loan product as well as work with Bridgehampton to, again, make

So in addition to the

on how this is really a public/private partnership to make this available to all homeowners, because our program is completely

application process, however, until the County does, in fact,

necessary to move forward with this program.

funded with private philanthropic dollars.

10:11AM 10

12

available to all Suffolk County residents. There is no cost to participate in this program, there's no application fee. anticipate that it will take about three days to do a pre-qualify so individuals that are going through the process of the

21

10:11AM 20

47 48

51

52

10:12AM

particular low income individuals that would not be able to access this program, will be able to access the Septic Program by utilizing this program. We look forward to continuing to do outreach and communication, in particular to those high need tier one areas that have been identified by the County to insure, again,

CHAIRPERSON HAHN:

choose to. Thank you.

those dollars available.

Okay. Stay right there. We have a question from Legislator Fleming.

that all homeowners are able to access this program if they so

Through our program we anticipate that 150 households, in

49 LEG. FLEMING: 50

Thank you, Gwen, for your critically important role in all of this. I know we couldn't do it without your CDC Long Island's assistance, so thank you.

53 54

MS. O'SHEA:

Thank you.

#### LEG. FLEMING:

You said you'd being doing outreach? Can you just describe a little bit what you envision that to be?

4

#### MS. O'SHEA:

Sure. Our hope is through all of the different programs, so in addition to the lending arm, so as a CDCFI, as a financial lender, we will be communicating with individuals, but also we do a lot around weatherization, first-time home buyer, financial assistance. We'll be communicating to all of the individuals that we serve about the availability of this program as well as making it available through all the social media outlets that we utilize, and we'll continue to work with the County by going to community forums that take place, so if individuals have questions about the lending product we can answer it there right on the spot.

10:13AM 10

16 17 **L** 

### LEG. FLEMING:

So you anticipate using the network that you already have in place to just get this information out, that's great.

10:13AM 20

#### MS. O'SHEA:

22 Correct.

23

21

# LEG. FLEMING:

Because so much of what we're doing revolves around cost and making the cost, you know, bearable for individual homeowners. It's a region-wide problem, the nitrogen overload and what it's doing to our shellfisheries and our fisheries and our, you know, our recreational waters. So to be able to reach -- I have been wondering how is it that we're going to get folks who aren't necessarily on the radar of new development or how do I spend money to upgrade my house kind of thing, but are still in critical areas that are close to or impacting already impaired water bodies. So you're just going to fold this into the outreach that you already do as well as tagging along with County when they do announcements?

10:14AM 30

# MS. O'SHEA:

39 10:14AM 40 Correct. I know the County is planning to do outreach and have everything available on their websites and, again, continue the community outreach, but we'll be working with other community-based organizations and partners that we have throughout all the townships and villages within Suffolk County, again, to your point, to really insure that those folks in particular in the most critical areas are aware of this program.

45 46 47

36

37

#### LEG. FLEMING:

Thank you very much.

48

#### CHAIRPERSON HAHN:

10:15AM 50 51

Legislator Krupski.

52

#### LEG. KRUPSKI:

53 Good morning.

54

#### 55 **MS. O'SHEA:**

56 Good morning.

#### LEG. KRUPSKI:

So this is a no cost application funded by private money?

2

### MS. O'SHEA:

That's correct.

7

# LEG. KRUPSKI:

And how -- you did 1.6 million. How -- what is the plan going forward for this program? And I know the County I think has done, you know, through Planning and the Health Department and Public 10:15AM 10 Works, have done a great job setting this up. I guess what happens when the money runs out? How does this, what you're setting up here, continue?

15

16

10:15AM 20

### MS. O'SHEA:

That's a really good question and I would echo your praise of the work that the County Health Department and the County Executive has done in really doing their due diligence to make this available to I think that's an importance question, that the dollars that are available that the County has earmarked for this only will serve a certain number of households. I think it behooves all of us that as the program becomes successful and we're able to demonstrate to continue the conversation of where are there additional dollars, whether it be at the State level or potentially even at the Federal level as they're talking about infrastructure investment, could we collectively advocate to ensure that some of those dollars come to this region for that very purpose. terms of how it stands right now, our intention is to utilize the dollars that have been made available through Bridgehampton and our private investors, Philanthropic Long Island Foundations, to really make sure we get to the 150, 200 if not more households based on the dollars that we know we do have available today.

10:16AM 30

# LEG. KRUPSKI:

Thank you.

35 36 37

> 38 39

> 40

33

34

#### CHAIRPERSON HAHN:

Thank you. Any other questions? Legislator Trotta.

LEG. TROTTA:

This money has to be paid back.

41 43

45

49

51

52

## MS. O'SHEA:

So this is a 15 year fixed loan, and I think That's correct. that's a really good point to underscore that the dollars that the County is making available are grant dollars. This is a loan. for individuals that do not have that type of disposable income to cover that cost in completing the system installation, this would be available to them at a very, very low cost.

10:16AM 50

#### LEG. TROTTA:

What percentage rate?

54

#### MS. O'SHEA:

Three percent fixed.

#### LEG. TROTTA:

Fifteen years. And how much -- is there a limit on how much they can borrow?

4

# MS. O'SHEA:

The program that we're offering is really tailored to ensure that it goes to homeowners that are utilizing the vested -- the contractors that had been vetted along with the systems. And so right now we're anticipating, based on the numbers that we've seen, that all in at the highest cost, that would be probably about eighteen five, maybe \$19,000, so we would cover that difference. So probably up to about -- we're averaging about \$10,000 based on the numbers we've seen.

10:17AM 10

13 **LITE** 

14 15

# LEG. TROTTA:

The County is going to give ten I think it is?

17 18

19

21

#### MS. O'SHEA:

My understanding is the County will provide up to 11,000.

10:17AM 20

#### LEG. TROTTA:

Up to 11,000. And these are the poorest of the poor I'm assuming.

23 24

#### MS. O'SHEA:

I don't want to speak. I think the County will probably go more into sort of --

27 28

29

31

# LEG. TROTTA:

Your program I mean.

10:17AM 30

#### MS. O'SHEA:

Our program actually goes up to \$300,000 annual earnings, so we are providing the loan for a large section of Suffolk County residents.

34 35

#### LEG. TROTTA:

Oh, so up to 300,000. Is there any special preference made for people making 80,000 a year?

38

#### MS. O'SHEA:

10:18AM 40

There's not any special preference made. Our hope, although nothing has been finalized yet, is we are investigating other private dollars that might be used to offset the cost for individuals that make up to somewhere in the neighborhood of 200% of the area median income. So that would really target the lower income residents in Suffolk County because we are concerned, as I'm sure many of you are, that a loan for an individual making \$60,000 a year, you know, is an additional cost that they may not be able to cover.

48 49 50

47

# LEG. TROTTA:

So they're making on a 3% loan -- are the people who are giving you this money making money?

53 54 **N** 

#### MS. O'SHEA:

No. This is a zero interest loan that they're providing to us in terms of getting back --

```
LEG. TROTTA:
          Who's making the 3%?
       2
          MS. O'SHEA:
          The 3% is helping to cover -- 3% is to insure in case there's any
          loans that are not paid back that we will be able to cover that
       7
          gap.
          LEG. TROTTA:
       9
          That was my next question. So what happens if you don't pay it
10:18AM 10
      12
          MS. O'SHEA:
      13
          Well, we're hoping that everyone will pay it back, but we'll be
          managing the lending product as we would any other lending product,
          where there could be deferred payment or there could be a default
      16
          on the payment, and that's part of the risk that we take as a CDFI.
      17
      18
          LEG. TROTTA:
      19
          And then what happens when there's -- I mean, there's 117,000
10:19AM 20
          pending foreclosures now in Suffolk County. So, I mean, this
      21
          potentially could have some effect on additional foreclosures.
                                                                               Ι
          mean, what --
      23
      24
          MS. O'SHEA:
      2.5
          Well, when you take a look at the percentage, again, it's a 3%
          fixed at approximately $10,000, that we're looking at about $50 a month in terms of what individuals will be paying back. And based
          on our historical work in lending, we work very closely with
          individuals that do borrow from us to insure that payment is being
10:19AM 30
          made and to talk with them if there are any challenges that come up
          so that we have a very, very low default our loan products.
      33
          LEG. TROTTA:
      34
          Are you going to be at the General Meeting?
      35
      36
          MS. O'SHEA:
      37
          Yes.
      38
      39
          LEG. TROTTA:
      40
          Okay. Thank you.
      41
      42
          CHAIRPERSON HAHN:
      43
          Any other questions? Thank you, Gwen.
      45
          MS. O'SHEA:
      46
          Thank you.
      47
          CHAIRPERSON HAHN:
      49
          The next speaker is Robert Carpenter.
10:20AM
      50
      51
          MR. CARPENTER:
          Thank you very much for allowing me the opportunity to speak.
      53
          here today to speak in support of the RCPP project, which is also
```

Resolution 1361. I would like to first thank a couple of people who are very instrumental in this grant proposal. One of them --

<sup>\*</sup> Index Included at End of Transcript

the first one being Auggie Ruckdeschel, who took it upon himself to write the majority of this grant, was very instrumental. Sarah Lansdale, the Director of Planning, and Corey Humphrey from the Soil and Water Conservation District. They were all very instrumental in this.

6 7

10:21AM 10

I'm here today to speak on behalf of Long Island Farm Bureau in support of this project. Agriculture over the past 13 years, since 2004, has been working to improve agricultural practices on Long Island to address water quality improvements. We started this process in 2004 with the first agricultural stewardship plan, which recently went through a ten year update and was passed unanimously by the Suffolk County Legislature in March of 2016. As a result of that, Farm Bureau has been working and has lobbied the State Legislature to secure over actually one million dollars in the EPF funding, Environmental Protection Fund, to help farmers with stewardship practices as a result of that stewardship plan. So there is already a tremendous amount of work being done.

19 10:21AM 20

16

18

21

22 23

27

29

37

40 41 The stewardship practices will help farmers with a number of things, including nitrogen reduction and improved water quality, by cost sharing practices such as controlled release fertilizers, with nutrient management plans, integrated pest management plans, irrigation system review, soil conservation practices and soil health improvements.

25

10:22AM 30

This RCPP project will allow many partners to work together, including the Peconic Estuary Program, the Farm Bureau, Cooperative Extension, Soil and Water Conservation District, the County of Suffolk, to help the farm community to implement these projects. It is also my understanding that this RCPP project will not cost the County anything; however, we do need the County to be able to accept the funds so that the farmers can work with Soil and Water District to implement nutrient management plans. So this project will be a huge addition to the money coming in through the Environmental Protection Fund from New York State and will complement our work that's already ongoing. So I would encourage you to accept this grant and allow us to work forward to continue to help water quality improvement on Long Island for farmers. Thank you.

10:23AM

#### **CHAIRPERSON HAHN:**

Thank you. Any questions? Sounds pretty awesome.

43 44 45

#### MR. CARPENTER:

Thank you very much.

46 47

49

#### CHAIRPERSON HAHN:

10:23AM 50

Okay. I skipped over correspondence and I think at the moment I skipped over we received an e-mail from the Clerk's Office with a letter that I re-forwarded to everybody so you probably have it twice on the committee, the correspondence regarding IR 1262, so that should be submitted for the record to the Clerk. That's for the record for this committee. Okay.

I am now going to -- before we go to the presentation, I'm going to ask that we take -- I'm going to make a motion to take IR 1274 out of order. So I made a motion; seconded by Legislator Muratore.

All those in favor? Opposed? Abstentions? IR 1274 is before us.

IR 1274 - Reappointing member to the Suffolk County Water Authority (Jane R. Devine) (Pres. Off.). I'll make a motion.

7

9

11

12

13

### LEG. MURATORE:

Second.

10:24AM 10

## **CHAIRPERSON HAHN:**

Second by Legislator Muratore. Jane, if you don't mind coming forward, wherever you feel most comfortable, at the podium or sitting down.

14 15 16

#### MS. DEVINE:

17 I feel comfortable over there with you.

18 19

#### CHAIRPERSON HAHN:

10:24AM 20

Yes, I know, you used to be a Legislator here. Welcome home, so to speak. I know you've been here many times, but we always love to see you.

22 23 24

21

#### MS. DEVINE:

Thank you.

25 26 27

#### **CHAIRPERSON HAHN:**

Just tell us a little bit about yourself and your experience so far on the Water Authority and why you'd like to continue to serve.

10:25AM 30

#### MS. DEVINE:

Well, one of the reasons I want to serve -- I want to continue, is because of the conservation of water, pure water, in this County. And your agenda shows that you're very interested in that as a committee yourselves. I mean, practically everything that you're doing has to do with water. That's how I spend a lot of my time now and have for the past two terms on the Water Authority. And I'm very proud to work for the Water Authority, because I think that as a public benefit corporation that we don't have taxing power, we raise the revenues through our rates, we have to keep a very tight budget, and I brought the proposed budget for 2018 with me in case anybody wants to take a look at that. We have been paring it down as the years go by.

10:25AM 40

43 44 45

47

49

I want to go back when I was first appointed, and I myself wrote and introduced ten resolutions and they did things like take away the credit cards from the board members, take away -- you're going to love this -- take away the credit cards, the cars, the health insurance. So I started that way as a former Commissioner of Consumer Affairs, thinking about the consumers of the water, the people who are ratepayers and what it meant to them in increase of rates by continuing with those practices, which I think are wrong. And so I have kind of kept that profile as I've served the Water Authority.

10:26AM 50

5/8/2017 EPA Committee Just recently we had the 2018 budget before us and we adopted the budget as it was amended and written, but then on top of that we considered a 10% reduction by a resolution that I forwarded to the whole board, and we are in the process of doing that right now, having the departments report to us on how they can reduce. When I was Commissioner of Consumer Affairs here, I was instructed to reduce my budget, my Operating Budget, by 10%, and I have this feeling ever since then you can always go into a budget and you can always find things to cut if you want to, because they're there. The extra money is there and you can still function well and as you 10:27AM 10 should. 11 12 So those are the kinds of attitudes that I take to the work that I'm going. I've always been involved in public service work all my I continue to do that outside of the Water Authority activity and I really want to be reappointed to continue what I'm 17 doing. 18 CHAIRPERSON HAHN: 19

10:27AM 20

Thank you. Are there any questions from the committee? Legislator Krupski.

21 22 23

# LEG. KRUPSKI:

Good morning. 24

2.5

#### MS. DEVINE:

27 Yes.

29

31

32

# LEG. KRUPSKI:

10:27AM 30

You sound like you're very engaged. I like that.

# MS. DEVINE:

I am.

33 34 35

41

43

45

49

51

# LEG. KRUPSKI:

So I've got a couple of questions about -- well, one is just a kind of a mechanical question about the remediation of the roadways when the new water mains go in, and so it's a concern and we get calls, you know, in our office on a regular basis. When the water mains go in there's big holes. We were down on Mill Lane in Peconic yesterday and there's cones there and they get knocked over and there's unsafe driving conditions plus there's, you know, it's left with quite a situation. Is there like an ongoing policy to remediate, to repave the road?

10:27AM 40

#### MS. DEVINE:

There is. It's actually most of that is contracted out. the work is done by our own employees, but most of it is contracted out, and so I will take that back to the CEO today actually and have him take a look at not only your particular area there, but also to the whole policy and maybe we need to tighten up our contractual agreements.

52

10:28AM 50

#### LEG. KRUPSKI:

Yeah. I'm not sure --

#### MS. DEVINE:

Maybe we need more supervision. 2

# LEG. KRUPSKI:

And I don't know about the timing of it, either. I know those mains went in over the winter, so I'm not sure about the timing of the paving and all that.

9

#### MS. DEVINE:

10:28AM 10

Yes, sometimes they form a little cavity.

12

#### LEG. KRUPSKI:

Well, you want to let it settle also before you pave it. 13

#### MS. DEVINE:

Yes, yes. 16

18

21

# LEG. KRUPSKI:

10:28AM 20

So I understand that. Thank you. And the other thing was really more of a larger overview and coming from the -- representing the North Fork where we have tried to manage the groundwater resources very carefully, and I know that your company came out to Southold Town and did a presentation on -- because there's an issue in August when everyone waters their lawn, it's just a volume issue of trying to get so much water down a pipe so big at exactly the same time in the morning when all the sprinklers go on.

27 28

29

# MS. DEVINE:

Right.

10:29AM 30

#### LEG. KRUPSKI:

And how your company has been addressing this and try to get people to spread out the use. Could you talk about that, on how you're working towards doing more outreach to try to get people --

35 36

#### MS. DEVINE:

Right. 37

38

#### LEG. KRUPSKI:

10:29AM

I guess to use less -- I hate to say it, you're selling water, but to say to use less water.

43

41

49

54

## MS. DEVINE:

We have a couple of ways that we're doing that. One of the things is we're asking people to water alternative days. So that's in the process of being implemented, an educational project. The other thing is we're looking at rates, and so for people who use over a certain amount of gallons per day, and it goes -- shoots right up in the summer, as you know, that if they use whatever the set rate -- the set amount of water will be, their rates will go up and sometimes that works. It should. It should work. We haven't done that yet, but we're going to do that.

10:30AM 50

# LEG. KRUPSKI:

I was going to ask, because I know that's been tried with other things, and people who want that product, whether it's water or

anything else, it doesn't matter, it's just the cost of doing business. So I wonder how flexible are you going to be? You said you're going to give it a try for a season and see if it has any impact or?

5

# MS. DEVINE:

Well, we're certainly going to test it and see if works, right. And I think that it will work to some degree, I really do, but we'll see. And then we'll have to reassess after that, as any business would.

10:30AM 10

11

12 **L** 

### LEG. KRUPSKI:

13 Thank you.

14

#### MS. DEVINE:

I would just like to say something about 1,4-Dioxane.

17 18

#### **CHAIRPERSON HAHN:**

ightarrow Oh, I was just about -- I was going to --

20 21

#### MS. DEVINE:

22 Oh, you were going to ask?

23

27

# CHAIRPERSON HAHN:

Well, I was going to thank you for the leadership of the Authority in developing the new advanced oxidation process. You know, the Water Authority really has been on the forefront of some cutting edge technologies to treat water, and so we thank the Authority for investing in that technology. And if you'd like to add anything.

10:31AM 30

# MS. DEVINE:

I would like to add something. As you know, this is not a regulated chemical.

34 35

33

#### CHAIRPERSON HAHN:

Can you turn that back on?

36 37 38

495051

#### MS. DEVINE:

10:31AM 40

It's not a regulated chemical yet, but I think it will be, and we have taken the leadership. We've looked at what's in our water now and I have with me, if anybody wants to see it, a large map of Suffolk County with the wells and the amount of Dioxane that's in those wells. And it's there, there's no doubt about that, and it's there because of products that we use. You know, cosmetics, some laundry products. But we have now, and we will be having a press conference about this in the very, very near future and I'll make sure that everybody on the committee is invited to that, we are going to introduce what we've done with this oxidation process. And the CEO said to me the other day, I said, "What does it look like?" I hadn't -- what I gave you I got after that. And he said, "Well, it looks a little bit like a tanning bed." I said, "What?" And it's a machine that actually takes the water, it goes through there and it has hydrogen peroxide in it and it takes out, and we've been testing this for a couple of years, it takes out 97% of the 1,4-Dioxane, which is an incredible, I think, result. And so I'm hoping that this will become the prototype for any area that

```
has this chemical in the water.
        1
           CHAIRPERSON HAHN:
        3
           Okay. Legislator Krupski has follow-up about the 1,4-Dioxane.
           MS. DEVINE:
           Yes.
        7
           LEG. KRUPSKI:
        9
           Thank you. I'd like to see that map.
10:32AM 10
       11
           MS. DEVINE:
       12
           Oh, okay.
       13
       14
           LEG. KRUPSKI:
       15
           How widespread is the problem? I mean, are you going to treat it
       16
           to a -- I mean, you're not going to treat it to a level of zero, you can't. So what level -- what level do you think, since there's
       17
           no standard and it's not banned and we continue to load groundwater
           with it, what level would you recommend that it be treated?
10:33AM 20
       21
           MS. DEVINE:
       22
           I can't -- I'm not a chemist and I'm not a --
       23
       24
           LEG. KRUPSKI:
       2.5
           That was putting you on the spot. I understand that.
       27
           MS. DEVINE:
       28
           Well, it's not on the spot, it's just not part of my job. I'm a
       29
           policy person as a board member, but we will listen to the experts
10:33AM 30
           and we will follow what they say. And then I think that it -- I don't think it's going to be very long before we have a standard.
       33
           CHAIRPERSON HAHN:
       34
           Right. One of the problems is that we don't have a human health
       35
           standard --
       36
       37
           MS. DEVINE:
       38
           Right.
       39
10:33AM 40
           CHAIRPERSON HAHN:
       41
           -- for 1,4-Dioxane.
       42
       43
           MS. DEVINE:
       44
           Right.
       45
       46
           CHAIRPERSON HAHN:
       47
       48
           We are waiting on the EPA.
       49
           MS. DEVINE:
       50
           I think we will get one.
       51
       52
           CHAIRPERSON HAHN:
       53
           The State has committed to, if the EPA does not come through as it should, and it should have, the State has committed to coming up
       54
           with a human health standard for 1,4-Dioxane, so we have to hold
```

```
them to that.
       1
         MS. DEVINE:
       3
         Right, right. And we would be right there with you.
         LEG. KRUPSKI:
          And the contributing factor is septic systems or is there another
       7
          contributing factor?
         MS. DEVINE:
      10
          Most of what I've heard as a board member is that it comes from
      11
          products that are used by humans.
      12
          CHAIRPERSON HAHN:
      14
         And legacy. There is some legacy contamination.
      15
      16
         LEG. KRUPSKI:
      17
         How do they get from the -- let's say it's in your shampoo.
                                                                          How do
      18
         they get from --
      19
10:34AM 20
          MS. DEVINE:
      21
         I guess it's the same -- it must be the septic system, right.
      22
      23
         LEG. KRUPSKI:
      24
          Okay. I didn't know if there is any other products that would get
      2.5
          in through the surface flow and through other drains --
      27
         MS. DEVINE:
      28
         I haven't heard of any.
      29
10:34AM 30
         LEG. KRUPSKI:
      31
         Okay. Alright. Thank you.
      32
      33
         CHAIRPERSON HAHN:
      34
         Legislator Trotta, did you have a question?
      35
      36
         LEG. TROTTA:
      37
         You talked about the rate increase for people who use a lot of
         water in the summer, but what's the criteria?
10:34AM
     40
          MS. DEVINE:
      41
          The amount of water that they use.
      42
      43
         LEG. TROTTA:
      44
         What number?
                        Is it a certain number of gallons?
      45
      46
         MS. DEVINE:
      47
         Yeah, it would be gallons.
      48
      49
          LEG. TROTTA:
      50
          Do you know what that number is?
      51
      52
         MS. DEVINE:
      53
         No, I don't.
                       I want to say 40,000 a month, but that sounds
          extraordinarily high.
```

```
LEG. TROTTA:
                           I have no idea.
          I don't know.
       2
       3
          MS. DEVINE:
          I'll get it for you.
       5
          LEG. TROTTA:
       7
          Thanks.
       9
          CHAIRPERSON HAHN:
      10
          Excellent. Any other questions? Legislator Fleming.
      11
      12
          LEG. FLEMING:
      13
          Thank you, Jane. I'm fully supportive of your reappointment.
      14
      15
          MS. DEVINE:
      16
          Thank you.
      17
      18
          LEG. FLEMING:
      19
          We're fortunate to have you. And I would like to just say as a
10:35AM 20
          woman in a sometimes man's world in the Legislature and public
      21
          office, I'm very grateful to you for blazing a trail. Seriously,
          let's be real people.
      24
          MS. DEVINE:
      2.5
          Maybe I'm still blazing. I'm the only woman on the Water Authority
          Board, too.
      27
          LEG. FLEMING:
      29
          There you go.
                           It happens all the time. There was a joint
10:35AM 30
          committee from the State Legislature, I think I mentioned to you,
          that used the Legislative Building to do a joint hearing on clean water, and I was on the first panel. I sat there with three men,
      33
          including my dear friend Al Krupski. There were maybe 30 State
          Legislators, one woman in that group, so it's still not -- despite what my colleagues seem to think, we still have a long way to go.
      35
      36
          But I say that just because I want to thank you, as a committed and
      37
          obviously very professional person. To be the only female in a big
      38
          group I'm sure was not easy and I'm grateful for you and all the
          others who have blazed the trail.
10:36AM 40
      41
          MS. DEVINE:
      42
          But I've always said, Legislator Fleming, the great equalizer here
      43
          is a vote, and my vote is the same as anybody else's vote. So you
          all have a vote on all of the things that come before you which
          make you equal, no matter what your gender.
      47
          LEG. FLEMING:
          Well said and I appreciate that. When you talked about the Dioxane
      49
          and all the great work that you're doing on that, something that's
10:36AM 50
          present in a very limited way in my district, I serve the South
      51
          Fork, but we do have detections of Chromium-6, the Erin Brockovich
          contaminant, and also p-phos.
      53
      54
```

55 MS. DEVINE:

56 Yes.

```
LEG. FLEMING:
         And I'm wondering if you could speak a little bit to efforts that
       2
         are being made on those two contaminants. I don't think they're as
         robust as the Dioxane. I'm hoping they will get to be, and I'm
         just wondering if you have any thoughts on that.
         MS. DEVINE:
       7
         I know that we're doing work on p-phos. I don't know the first one
         that you mentioned. I'm not familiar with that.
10:37AM 10
         LEG. FLEMING:
      11
         Chromium-6 is -- the standard is for all Chromium, but Chromium-6
      12
         is a specific contaminant that was made famous by Erin Brockovich.
      13
      14
         MS. DEVINE:
      15
         Oh, I know that. Yeah, I know about Erin Brockovich.
      16
      17
         LEG. FLEMING:
      18
         And has shown up in wells in Wainscott in Easthampton.
      19
10:37AM 20
         MS. DEVINE:
      21
         Is that the only place, in Wainscott?
      22
      23
         LEG. FLEMING:
      24
         That's the only place in my district that I'm aware of.
      2.5
         MS. DEVINE:
      27
         Okay.
      28
      29
         LEG. FLEMING:
         But I do know that Senator Murphy has a bill that I'm very
      31
         supportive of. I met with him in Albany not long ago to try to get
      32
         standards established for Chromium-6. But other than that I'm not
      33
          sure what's happening. I was wondering if you had any thoughts, if
         you don't now, if maybe in the future we could follow-up.
      35
      36
         MS. DEVINE:
      37
         We'll absolutely follow-up on Chromium-6. P-phos we have been
      38
         treating. I believe it's out by the airport.
10:38AM
     40
         LEG. FLEMING:
      41
         That's correct, Gabreski Airport.
      42
      43
         MS. DEVINE:
      44
         Right. And we have been treating that, and I think we're at a
      45
         place where it's acceptable levels at this point. I believe we
      46
         are.
      47
         LEG. FLEMING:
      49
                         Well, I think there's a simple carbon --
         That's right.
10:38AM 50
      51
         MS. DEVINE:
      52
      53
         Yes.
      54
         LEG. FLEMING:
```

-- fix which you all have done --

<sup>\*</sup> Index Included at End of Transcript

```
MS. DEVINE:
          Right.
       2
       3
          LEG. FLEMING:
          -- in the public water supply and we're struggling with it in the
          private water supply.
          MS. DEVINE:
         Uh-huh.
10:38AM 10
          LEG. FLEMING:
      11
          But apparently there are other water authorities in the district,
      12
          or at least one other, that has discovered it in the public well
          there, so I think it is of great concern and we need to look at.
      15
                     (Presiding Officer Gregory joined the meeting)
      16
      17
          We have so many private wells as well. So I think your efforts on
      18
          the public water supply could inform and educate us about the
      19
          surrounding water quality.
10:38AM 20
      21
      22
          MS. DEVINE:
          Well, it can, and through our Education Program we can certainly
          reach out to the whole community. But, you know, our obligation is to the ratepayer, so we would -- we would be more concerned about
          public -- our public water that we supply, about treating that.
          That's our job.
      27
          LEG. FLEMING:
      29
          Right. No, and I appreciate that. I just hope it's on the radar
10:39AM 30
          screen.

          MS. DEVINE:
      45
          Thank you all very much.
      47
          CHAIRPERSON HAHN:
      48
          It now goes before the full Legislature. Thank you. Okay. We now
      49
          have a presentation. Walter Dawydiak and Justin Jobin from the
      50
          Suffolk County Department of Health Services, Division of
      51
          Environmental Quality will provide an overview presentation on
          Introductory Resolution 1262-2017 - A Local Law to establish a
      53
         Grant Assistance Program for the installation of Innovative and
      54
          Alternative Onsite Wastewater Treatment Systems. Walter, and
          Peter, maybe if you take 60 seconds, Walter, 60 seconds, if you
```

wouldn't mind taking 60 seconds before you begin the presentation that you're here for, just to kind of comment on if we got anything wrong about the 1,4-Dioxane when we were having that discussion earlier? Because I know that, you know, there are multiple sources. It's not just personal care products. It's a legacy contaminant from, you know, industry as well. And then maybe if you could speak to the -- again, just really quick, Chromium-6 and p-phos, if there's anything you want to clear up that was going on in that discussion.

10:40AM 10

#### MR. DAWYDIAK:

I think the discussion was substantially correct. I would just add that with respect to 1,4-Dioxane we've definitely documented that there's a significant number of detections associated with legacy solvent plumes. Dioxane was associated with TCA, an industrial solvent, which was also a cesspool additive heavily used in the 70's before it was banned in the 80's. So there's a lot of legacy contamination. And where we pick up solvent plumes like TCA and PSE we also pick up Dioxane and these public supply wells are pumping in such mammoth amounts of water that the Dioxane is soluble, mobile and persistent, even more so than the underlying solvent it's associated with. Definitely a potential risk with respect to the pharmaceuticals, personal care products, shampoos and detergents.

,

10:41AM 20

21

35 36

37

38 39

40

41

47

49

54

We've taken thousands of samples. Thanks to you, Legislator Hahn, we've instituted this method. In our laboratory we've documented on the order of 40% detection, consistent with what the Water Authority found in the deeper public water supplies. Fortunately a very low detection rate in the shallow private wells and shallow or non-community, so that was a bit of good news. But we are testing in soils and sludges. We'll have a better idea of individual sources, like laundromats, car washes, industrial facilities, that may be using this this coming year as we've instituted our

10:41AM 30

CHAIRPERSON HAHN:

secondary method.

Thank you. Anything you want to say about Chromium-6 and p-phos?

# MR. DAWYDIAK:

No, I think it was substantially accurate. Chromium-6 is generally naturally occurring. There's a level of background based on oxidation of Trivalent Chromium, which is naturally occurring in our aquifer. There's no standard for it. I believe California uses ten for the Hexa Chromium. None of our samples, to my knowledge, have been above that. They are out there. We are working with DOH on it, health impact assessment and potentially following-up on a standard. And Legislator Hahn, you were correct. PFC's have been out there at low levels in at least one other public water supply. They have been tested as part of the unregulated contaminant monitoring rule. The biggest areas of PFC are in Gabreski, Westhampton and in the Yaphank area that we're working toward resolution right now.

10:42AM 50

# CHAIRPERSON HAHN:

56 Thank you. Okay, now for the reason you're here.

#### MR. SCULLY:

Great. So sorry that you didn't expect me but we've been working really hard, have a lot of things going on at the same time.

# CHAIRPERSON HAHN:

use in Suffolk County.

arrow this way? Yeah.

for that, Legislator Hahn.

We'll allow it.

#### MR. SCULLY:

10:43AM 10

Yeah. We have been out in the community. We had the series of town hall meetings and have been presenting to folks in the community. We have a presentation here which starts with the slides we've been showing folks out in the community. I'll try and blast through those and turn it over to staff on any of the program issues.

But by way of background, as the Legislature well knows, having

the field to make sure that they perform the way they advertise that they perform. It has us working to create an industry to

It had the Legislature enacting Article 19 of the Suffolk County

installation of those systems and we're reaching a point now where

redundant. I'll just go through these slides quickly. We've been showing folks in public why there is so much interest and concern about these non-performing systems and their impact on groundwater and by extension surface water. This is data that's gleaned from the Comprehensive Water Resources Management Plan showing the

significant increases in the nitrate concentrations in groundwater

over time. Similarly this is a graphic depiction -- oh, thank you

The message we try to take away here is to show -- try to draw the link between the systems and what people see going on around them

and obviously the pie chart in the middle, which is taken from a study of the Great South Bay, but the results being consistent with other work that's been done about the impact of nitrogen on water.

we want to see systems in the ground, and that's the point of --

Sanitary Code last year to designate the Department of Health Services as the responsible management entity to oversee the

So many of you have seen this information. Some of it is

support the installation of those systems once they're approved for

been very much involved and fully supportive of our efforts, we've been busy setting the table for an evolution away from the use of non-performing cesspools and septic systems towards the use of new IA or performing treatment systems. It's a multifaceted effort that has us looking at pilot testing of individual technologies in

16

21

10:43AM 20

27

10:44AM 30

33

10:45AM 40

43

45

49

10:45AM 50

About 70% of the impact of, nitrogen impact, is seen as coming from cesspools and septics. Agriculture and lawn fertilizers are also impacted, but they are dwarfed in comparison. We've been making clear that it's the cesspools and septics that are in the ground that are the issue. This is a chart that kind of lays out the multiple legs that we're working on. I've just been discussing those. We're in the process now of working on code

\* Index Included at End of Transcript

amendments. I want to thank Legislators Krupski and Fleming and Legislator Hahn, and even Legislator Trotta who has been joining us at the working group and offering some productive guidance on how we should proceed in terms of the use of these systems in future.

5

7

We're here today because of last leg. We want to put these new technologies in place and we have an idea, the County Executive has an idea about how to make it more affordable for folks to make the change voluntarily if they would like to do that, and that's the Grant and Loan Program we're here to discuss today.

10:46AM 10

Grant and Loan Program we're here to discuss today.

The department, meanwhile, is actively at work. Subwatersheds

Plan, which is actually going to delineate all the subwatersheds in this County, more than 180 I believe, and allow us to have even more refined information to make policy decisions moving forward about where we might want to consider requiring the use of these system, but initially will tell us where the use of these systems can have the most benefit. I think what I'll do now is turn it over to Justin to talk a little bit about the demo program and run you through the history.

10:47AM 20

# MR. JOBIN:

Thank you, Peter. Suffolk County Health Department, where we have two demonstration programs where we're looking at 14 technologies total, was started in 2014. And everyone here is aware so I'll move through this very quickly, but the initial demonstration program was four manufacturers and six technologies that were installed in 19 homes. Now we're halfway through phase II where we're installing 23 systems, eight different technologies. So out of the phase I systems, these are the manufacturers.

31

21

22

23

27

28

Just an important thing to note is that with such a high density of septic systems in Suffolk County, we had international interest in our demonstration program to donate systems for evaluation. So these are some of the companies here, Norweco, Busse out of Germany, Orenco and Hydro-Action.

37

10:48AM

In addition to the treatment technologies, we're also evaluating different ways to disperse the effluent. So the pressurized shallow drain fields allow treated effluent to be dispersed on the top 18 inches of the soil horizon where there is more treatment, more microbes in the soil chemistry can breakdown particles in the wastewater even further, and estimated additional nitrogen reductions through plant uptake and microbes up to 50%.

44 45

So out of the six technologies, four of them are provisionally approved for use right now in Suffolk County. Our limit is 19 milligrams per liter, hydroactions average is 12 milligrams, the other three technologies are right around 18.8, 18.9 milligrams per liter. The AdvanTex AX20 is not meeting our performance standards and the Busse system wasn't working properly. It was not meeting our standard, so we took them offline. The manufacturers reassessed them and now they've -- as of last week they're back online and we're hopeful that they'll be performing.

10:49AM 50

55 56

So as part of phase II we have these eight technologies and I can go through each one, but just want to mention again we have international interest. We have a Fuji Clean system from Japan, we have two systems from Canada and a couple of US systems.

7

So out of these, 11 of these are -- actually 13 as of last week, are currently in the ground. So I'm going to turn this back over to Peter to talk about or to Walt to talk about the Septic Improvement program.

10 11

12

# MR. SCULLY:

Great. So, again, we're working with information that we've been providing to citizens at a town hall meeting, and apologize if some of it has limited value for Legislators. This is a copy of the local law obviously. This is a copy of the language that was included in the Charter amendment which the voters approved in 2014. I know based on my prior discussions with Supervisor Romaine that he was instrumental in seeing this language included providing no less than \$2 million for the installation of residential and commercial enhanced nitrogen removal systems. That's the language on which we're relying to use the proceeds of the Drinking Water Protection Fund for this grant program.

10:50AM 20

22

27

21

So here's some details on the program for those of you who have not been involved in discussions to date. The grant portion of the program will be administered through our Department of Health Services. We'll be adding staff to do that using State funding from grant sources. We'll be adding four staff to do that. Individual homeowners can be eligible for a grant of up to \$11,000. It's a \$10,000 basic grant plus \$11,000 for the installation of a pressurized shallow drain field. Justin talked a little bit about the benefit of that. And as indicated, any other cost not associated with this system installation would be the responsibility of the property owner.

10:51AM 30

Gwen O'Shea was here on behalf of CDCLI. As one of the Legislators noted, we would not be in a position to offer the program without their assistance. There are basic facts about the program that they will be administering on their side. The County would have nothing to do with the loan program. That would be administered 10:51AM 40 using -- by a third party lender using private funds. 41

43

45

49

Eligibility criteria are here and also I think they're set forth in the local law. We're looking for single family residences that are owner occupied year-round and primary residents. It has to be, obviously, served by a septic system or a cesspool that this new system will replace. We're not looking to provide grants for rental properties. We are not proposing to provide subsidy or grants for new construction at this point, but the law would require or could allow for grants for folks who are dong significant or substantial expansions on construction projects and need a new system. And we're not proposing to fund any improvements to business properties and are requiring CO's or Certificate of Zoning Compliance as we might.

10:52AM 50

We need to verify income because this is a, you know, there's some eligibility criteria there. And the way the law is structured, no current employee of Suffolk County or elected official or office holder of any political party, including a political party committee member, would be eligible.

6 7

10:53AM 10

And so the grant assistance criteria is pretty much based on the New York State Star Property Tax Rebate Program, which sets an income ceiling of \$500,000 per household for eligibility, but we set a threshold of \$300,000 household income for eligibility for a full grant. Above that level you would be eligible for 50% of the maximum grant of \$10,000. And staff indicates that with that type of eligibility requirement we cover about 96% or 97% of the households in Suffolk County. We're trying to maximize the benefit.

16

21

27

There is a scoring criteria. You guys probably all have the information about the scoring system that staff devised. We'll be placing priority on areas that are more sensitive, the first tier being those within the zero to two year travel time, the second tier between two and 25, and the third tier being any other property in Suffolk County. We are working with a -- this is a preliminary map of priority areas, but we'll be refining the map for the purposes of doing the actual analysis of applications. Staff is doing that in the Health Department.

2

10:53AM 20

Here's information we've been using to show folks the comparative cost of these systems. The cesspool replacement staff puts at 4,000 to \$6,000; some folks use higher numbers. A new septic tank with leaching pool sytem could cost six to \$8,000. We know that there are folks who are paying a lot more than that. We had a discussion with a staff member of one of the organizations we're working with who had had a cesspool replaced recently. Sometimes when a cesspool fails it's a very quick decision that needs to be made, and that homeowner paid \$12,000 on a credit card to get the cesspool replaced. She probably could have gotten a better quote if she got a second opinion. But staff puts the cost of an installation of one of these new systems all in, this is a retrofit situation, at about \$17,850.

10:54AM 30

We continue to have the discussions with the construction trades about any additional expense that we haven't flagged yet that should be included in the analysis. We're continuing to work, for example, with the Long Island Builders Institute about concerns that they have. And if and when we get additional information we'll refine those numbers, but that's what we're looking at right

47 48 49 now.

39 40

41

Here's a slide we use to show folks how the combination of the grant and loan could work to make a system more affordable. Remember, when a homeowner is faced with the possibility of having to go in pocket and make a disbursement of \$6,000, that's a significant expenditure for most people in this County. Under this program, somebody who is facing that type of expense for the replacement of a system in kind could instead look towards the County's program for the installation of one of these new systems,

10:55AM 50

and rather than paying out of pocket \$6,000, could actually put together a combination of grant and loan that had them instead paying \$54 a month for the installation of the system over 15 years. That is good by comparison, recognizing that these systems, unlike septic and cesspools, carry other costs. They need to be maintained so there is some annual maintenance costs. Staff puts that at between \$300 and \$500, depending on the system, and they do utilize electricity.

10:56AM 10

So here's where we're at in terms of process. May 8th, middle of the board there, we're here before you and hope that this resolution will be discharged and available for consideration by the full Legislature on the 16th. If we move forward a pace we're working with IT to stand up an electronic application process. We're hoping to have the program up and ready to accept applications on July first.

18

19

21

22

23

And we are here to answer any questions that you may have about the program or the way it's going to be implemented. For those of you who have been involved in discussions so far, we appreciate your time and your support. Thanks.

10:57AM 20

#### CHAIRPERSON HAHN:

Legislator Krupski.

24 2.5

27

#### LEG. KRUPSKI:

10:57AM 30

First of all, just it's an impressive amount of work that everyone has put into this and it's I think very well thought out. I mean, you certainly have reached out to I think everyone, all the user groups, all the towns, all the different municipalities, planning, engineering. I think it's helped make a better work product and thank you for that.

Two things. I have two questions. One is that one of the slides referenced poor soils. You mean soils with poor drainage? I'm a just a soils guy so it just bothered me when you said poor soils.

37

33

#### MR. JOBIN:

10:58AM 40

Sure. Poor soils can represent typically poor drainage or also poor soils in high groundwater sites are kind of used hand in hand as well. So I think that slide you're referencing was in regards to the pressurized shallow drainage field, in which case you can utilize the upper horizons, the top 18 inches of the soil to better treat the wastewater and provide additional separation to groundwater. So in some areas it might be a more feasible alternative than a five pool system with expensive retaining walls.

47

49

#### LEG. KRUPSKI:

10:58AM 50

Okay, thank you. And then are you going to prioritize projects? Some of the local municipalities are thinking about, in some areas, mandating these for reconstruction in sensitive areas. If that's the case and you get a permit that you've got to move your system because of environmental conditions, are you going to prioritize those projects for this, you know, for this program?

#### 1 MR. SCULLY:

Let me restate the question to make sure that I understand it. So the question is that in situations where a local government may institute a requirement for the instillation of one of these systems as part of a reconstruction, would we prioritize those because they are a requirement of local government.

7

9

# LEG. KRUPSKI:

Yes.

10:59AM 10

### MR. SCULLY:

We have not had that discussion yet.

13

21

24

2.5

27

# LEG. KRUPSKI:

Because there have been instances where in the past because of existing groundwater conditions and setbacks to wetlands, that the Health Department had been requiring these elevated systems, some elevated with soil and some elevated with cement retaining walls. These systems would be considerably less expensive than those and probably much more efficient at treating the wastewater, so I think where those systems are currently mandated by the Health Department certainly I think there would be widespread acceptance going to one of these systems.

10:59AM 20

# MR. SCULLY:

I think that point is well taken and it is a point that staff has been making to the public about these new systems being a more cost effective alternative to more conventional systems requiring costly retaining walls. So your point is well taken.

11:00AM 30

#### LEG. KRUPSKI:

Thank you.

32 33 34

31

#### CHAIRPERSON HAHN:

Legislator Trotta.

35 36 37

> 38 39

> 41

#### LEG. TROTTA:

Have any of these been approved yet?

40

#### MR. SCULLY:

Four technologies have been provisionally approved for use in Suffolk County. Any homeowner could go to the Health Department and seek approval or get a permit to install these systems. And, in fact, homeowners are before the Health Department now who are engaged in installation of these systems.

45 46 47

#### LEG. TROTTA:

48 Are any of those made in America?

49 50

# MR. SCULLY:

I think all of the ones that are approved for use here are made in the United States.

54

#### LEG. TROTTA:

Okay. Two other things. How do you -- I mean, that chart with, you know, where you got where the pollution of the nitrogen comes

from, how do you figure that out, like 69% percent came from -- I mean, I just don't --2

#### MR. SCULLY:

I'm not the scientist, but I checked with the folks at School of Marine Atmospheric Sciences and asked what the basis for that was and they sent three different studies. Walt, can you speak to it?

#### MR. DAWYDIAK:

11:01AM 10

That study was basically based on a primarily a Valiela analysis. Valiela is a scientist, a PhD in New England, who's done a lot of regional nitrogen loading work. Back in the 1970's in the 20A study the assumption was that fertilizer was a higher relative percentage of nitrogen loading than septics. Based on a lot of the environmental work, and some of this is empirical observation and measurement in groundwater and correlating it with land use, some of it is mathematical modeling, but basically there is partition being associated with different nitrogen sources and that which actually reaches groundwater. And we were a little surprised that the numbers were that high. I mean, 70% -- the rule of thumb in the old days was about 50/50 for residential fertilizer and residential septic, and median density areas like Great South Bay that number is about 70% septic.

11:01AM 20

21

22

27 28

24 MR. SCULLY:

2.5

I can -- I'm happy to -- I raised the question with folks at SoMas, just because it's not really our expertise, and I knew that the initial study being cited was of the Great South Bay, but Dr. Chris Gobler sent me three additional studies which he said supported the same conclusion, and I'm happy to forward those to you.

11:02AM 30

LEG. TROTTA:

Okay. There is 400 people this is going to affect this year?

34 35

32

33

#### MR. SCULLY:

We're hoping that the initial phase of the program will fund improvements at 400 parcels over two years.

38 39

# LEG. TROTTA:

11:02AM 40

Okay. So the thing that caught my eye was four staff members. How much are they going to make?

41 43

#### MR. SCULLY:

How much are the staff members going to make?

45 46

#### LEG. TROTTA:

You're hiring four people, you know, to -- it's only a \$2 million 47 project. So, you know, that's going to take up substantial -- 10, 20, 30% of the money we have to do this. 49

11:03AM 50

#### MR. SCULLY:

51 No, the funding sources are separate. We'll be using State grant funds to pay the salaries of the staff.

54

#### LEG. TROTTA:

It's still taxpayer money. Do we have anybody in the house that --

```
5/8/2017 EPA Committee
         what's their function?
         MR. SCULLY:
         Well, we envision an Account Clerk to do the grant management, two
         Sanitarians to do the in-house evaluations and fieldwork associated
         with the installations, and an advocate to help --
         LEG. TROTTA:
         Go back to the second. What did you just say? What are they going
       9
         to do?
11:03AM 10
      11
         MR. SCULLY:
      12
         Sanitarians.
                        They'll do the technical reviews and field
      13
         inspections.
                        They're people who work with septic infrastructure.
      14
         LEG. TROTTA:
      16
         So don't you have an area where you want these to go in regardless?
      17
         I mean, the target area I'm assuming is near the water. Why do we
         need people to tell us that they need to go there?
11:03AM 20
         MR. SCULLY:
      21
         If I didn't communicate clearly I apologize, but the purpose of
      22
         that staff would not be to tell us where the systems need to go,
         but to evaluate applications as they come in the door.
      24
      2.5
         LEG. TROTTA:
         And what does that entail?
      27
         MR. SCULLY:
      29
         I'll defer to staff.
11:04AM 30
      31
         MR. DAWYDIAK:
         So there are two basic Sanitarian functions involved.
         review, then the other is site inspection. So plan review means
         that you look at the nuts and bolts of a proposal, everything from
         separation distances, design, depth to groundwater, hydraulics.
         All of these things need to conform with the County and State
      37
         Sanitary Code. New York has got a very aggressive program in terms
         of ensuring that engineered units are submitted by a design
         professional and the detail --
11:04AM 40
      41
         LEG. TROTTA:
         You already said they were approved. You have four that are
      43
         approved.
      45
         MR. DAWYDIAK:
         They're approved for use, but for every individual site we need to
      47
         make sure that they're designed to the proper size and that they're
         located properly given site constraints.
      49
         LEG. TROTTA:
      51
```

11:04AM 50

Give me specific examples of what would be different from one house 53 to another.

54

MR. DAWYDIAK:

Depth to groundwater. So if you had a --

#### LEG. TROTTA:

Backup. You're already picking your locations where these are 2 going to be approved, so site to groundwater doesn't mean anything.

# MR. DAWYDIAK:

It does for an individual site because a homeowner has no idea whether he's got two feet or four feet to groundwater.

# 9

12

#### LEG. TROTTA:

11:05AM 10

But what's the difference?

#### MR. DAWYDIAK:

The difference is how the system is laid out in terms of elevation. 13 Some of them may require supplemental fill, some of them may be required to be moved to a site which is more amenable to this system to meet separations. 16

#### 17 18

19

21

22

# LEG. TROTTA:

So the people selling this won't know this?

# 11:05AM 20

### MR. DAWYDIAK:

The engineer that designs it will know it. The people that are selling it have a good idea of how and where these need to be done. but in New York State a licensed, professional engineer or architect is ultimately responsible for site specific design and layout.

# 27 28

29

31

# LEG. TROTTA:

If it's going in a house, I mean, how many different places could

# 11:05AM 30

#### MR. DAWYDIAK:

You'd be surprised. There are often many, many degrees of freedom as to where and how to locate and site these, and it requires a good amount of experience and judgement to come up with an optimized design. For example, the pressurized shallow drain field is one solution that a lot of folks locally don't have a lot of experience with. We're fortunate to have Justin Jobin, who's looked at hundreds of these in Rhode Island over a decade and does have that kind of experience, to work with educating the community moving forward.

# 11:06AM 40

#### LEG. TROTTA:

But what are the options? Let's say I live the near the water and I want to put this in. I want to know why I'm paying somebody to tell me to design it. It seems to me the systems are self-contained and they're all basically the same -- each type is the same.

#### 48 49 50

51

41

43

45

47

## MR. SCULLY:

Your basic concern, I think, is a legitimate one but it's outside the control of the County or the Legislature because it's New York State Law that requires that a licensed design professional oversee 53 and certify the installation. We don't have any control over that. 54 It's not required in other states that we've been working with, but it's a reality here.

#### MR. DAWYDIAK:

If I could add to that. I mean, just a short year ago your only option was to put a big, ugly concrete retaining wall and mound the thing way up and put a shallow five pool system. Now you have a lot of degrees of freedom. With the advanced treatment you need less leaching area, you need less separation to groundwater, you can disperse your effluent so that it will fit better on a site and it will treat the wastewater better. And this is a bit of an art. This is why you need a professional designer to size up a site and see what the best way to move the wastewater around is.

11:07AM 10 11

**CHAIRPERSON HAHN:** 

Okay. Presiding Officer Gregory, did you have a question?

P.O. GREGORY:

Yeah. I was just trying to wrap my head around the cost. I saw the, as best we can, the different -- the comparisons, the different type systems, but just all the cost. And you had mentioned, Peter, like a -- I think you said \$300 to \$500 -- or \$300 yearly maintenance fee, that if you took the loan it was \$54 I think you said. And you kind of said there's an electric cost, too. Do we have an estimate of what that is? You know, all that wrapped into one, what's the, you know, the comparison to I guess the standard system that most people have today.

25

21

11:07AM 20

MR. SCULLY:

Okay. So I think I'm going to defer to staff on the range of -range of maintenance cost and energy usage, because they do vary by technology and we'll try to get to that, all numbers wrapped up into one piece for you.

11:08AM 30

I would note that in some places in Suffolk County, my community is one of them, we, like other homeowners, face certain expenses to own and operate a home that are typical, including electrical usage and fuel and property taxes and water supply, but in communities like mine which are not served by sewer, we may not face any cost whatsoever for wastewater. I have lived in the same home since 1986 and have never had to, you know, invest in my system at all at this point. It continues to function and operate properly.

40

Some people would point out that some folks on the South Shore are not so lucky. Some of them, particularly in communities like Oakdale, are faced with the need to pump their systems three or four times a year at a significant cost. So you have very diverse experience here in Suffolk County, even among those property owners who are not served by sewer.

47

49

So anything, Justin, on the range of maintenance cost and then the range of energy use, and then for the Legislator's benefit try to wrap that up into a single annual cost that includes a grant and loan scenario, a maintenance scenario and then energy cost.

11:09AM 50 51

#### MR. JOBIN:

So one thing to mention is there are operation and maintenance costs. These systems are not -- they're active systems. They're not just set and forget mentality anymore. Out of the four

provisionally approved systems, all of them, the average costs do not -- or the operation maintenance costs do not exceed \$300 a year. County Sanitary Code requires that the first three years is built into the sale of the system, so there is no expense in operation and maintenance for the first three years. After that it does become the homeowner's responsibility, like they would pay for oil burner maintenance or vehicle oil changes or things of that

9

11:10AM 10

Operation is a different story. Each system has a different component that utilizes electricity. We're seeing that the cost range on these systems, based on our currently electrical rates, is between \$2 and \$20 a month, and that's technology specific.

14

16

#### MR. DAWYDIAK:

If I could just add in a nutshell. These costs are less than half of what someone would expect to see -- to spend for a sewer use fee if you had collection and treatment. And the capital cost of these things, again, when you're talking about 17, \$18,000 per household versus estimates that we're getting for sewering that are in the 50 to \$100,000 range per household or more, the cost effectiveness on a per pound nitrogen basis is hugely superior than sewering them. And, again, the homeowner cost, \$300 a year plus on the order of ten bucks a month for electrical is modest.

25

27

21

#### P.O. GREGORY:

Okay. Thank you.

28

# **CHAIRPERSON HAHN:**

11:11AM 30 Legislator Fleming.

\_\_.\_.

#### LEG. FLEMING:

Good morning, everyone, and thank you so much for all your efforts to date. Really very impressive effort. I just have a couple of questions with respect to the costs. Could you talk a little bit about what your expectations are regarding cost moving forward? I think, Justin, you may be able to address it from your experience in Rhode Island or even from the experience at the level of interest that you've seen from the industry in the second round of pilots. You know, now people are hearing there are 360,000 units that need to be replaced. What is that doing to the industry in terms of their willingness to come up with these solutions with a lower price tag?

11:12AM 40

45

49

#### MR. JOBIN:

Absolutely. So we have a market here. It's the largest market of septic systems in the US. We're the most densely populated area, and what we've seen from interest, I mean, we've already seen local or manufacturers set up a local distribution network. Two of the technologies are being manufactured here in Suffolk County. So there is that network.

11:12AM 50

My experience in Rhode Island was initially we had one technology that was the major system going in the ground and the costs were around \$30,000. And then over a decade later multiple technologies came in and the cost dropped and ended up averaging around \$20,000.

What we're seeing here is the average cost, because there's multiple technologies already approved for use and there's a local distribution network and a huge demand and a lot of systems, that we're seeing the average cost around \$18,000. So obviously as more systems come into the marketplace -- and when you do have 360,000 systems there's incentives for manufacturers to continue their research and development and ultimately come up with a better product that's less expensive. So I think that's just normal free market and that should ultimately stabilize the cost. But right now we're seeing around \$18,000.

11 12 **LEG. FLEMING:** 

18

19

21

27

28

11:14AM 20

11:14AM 30

11:15AM 40

45

49

11:15AM 50

11:13AM 10

This might be for you, Peter. In terms of driving the market, what role does the grant and loan program play? And if you could just address also what the funding source is and how this is consistent or not consistent with the purposes for that funding source.

MR. SCULLY:

Excuse me. Sure. So as I indicated earlier in my comments, there was a Charter amendment approved by the voters in 2014. The same language was initially part of a 2011 local law that was challenged and unfortunately there was an adverse court decision. Subsequently there was a settlement between the County and the plaintiffs, which resulted in a referendum in 2014 incorporating the same language and I cited it in the presentation. I think it says something like no less than \$2 million a year will be made available for the installation of commercial and residential nitrogen reducing systems.

With regard to the question of controlling the market, we've been working quite closely with states in the northeast. Legislator Hahn was one of the brave souls who took part in a septic tour of four states in three days, and we've benefited from the experiences in all of those states, both positive and negative, in trying to craft this program. And in working with the State of Maryland, we know that in order to provide predictability and consistency on price and to avoid situations in which, you know, a third party could be involved in a transaction driving up cost, what the State of Maryland did was to issue a procurement document to manufacturers and to explain to the manufactures that the State of Maryland would be implementing a -- kind of a broad IA system installation program under its Bay Restoration Program, and that it wanted from the manufactures fixed pricing for system installation, soup to nuts, including, you know, installation, you know, supply, installation, all labor and related services at a fixed price so that they could post those prices for the benefit of consumers. Consumers knew what they would pay and could select a vendor, and we're engaged in that process right now in Suffolk County.

We generated a procurement document and met with the industry and are receiving proposals from the industry on May 18th, which is going to tell us with more certainty what folks can expect with respect to pricing. There's a difference between our program and Maryland's. In Maryland residents already had in place, you know, drainage structures that could be utilized as part of these new systems. In Suffolk County -- leaching fields those are called.

\* Index Included at End of Transcript

Maryland decided to include Suffolk County that's not the case. just the basic treatment units in their program, which made it somewhat simple. We're going to go past that and provide drainage So we're going to address that in the procurement process by offering a variety of scenarios for the manufacturers to put price points on as part of the procurement. We're anxious to see what those numbers look like when they come in on the 18th.

### LEG. FLEMING:

11:16AM 10

Thank you. Thank you, Madam Chair.

### **CHAIRPERSON HAHN:**

Thank you. Any other questions? I have a question about speed of approval upon failure of the systems. Do we have a process yet established so that when someone's system fails, their current cesspool or septic system fails, that we can have a new system installed if we so choose regardless of priority area?

18

21

#### MR. DAWYDIAK:

11:17AM 20

Legislator Hahn, there's a couple of different issues involved here. One of them are Article 6 code changes, which involves a regulatory review process on failure. This is one of several policy options that are separate from this particular program. goal is to go live with that sort of a proposal and program as of January 1st of next year, and the Health Department is ramping up with the process wherein there will obviously be an expedited. accelerated design installation and review process, maybe a third party engineer validating it with follow-up inspection just to make sure that everything was done properly. That clearly would need to be expedited.

11:18AM 30

In terms of this particular program, given the dedicated Sanitarians, Clerk and Consumer Advocate, anything that comes in with available funding is clearly going to be on the top of the pile. And the goal is to accelerate review approval and installation to within roughly a four to six week process because New York State requires plan review and approval in advance of these engineered systems. It can't be an overnight thing, but it will be an accelerated, expedited process.

11:18AM 40

#### CHAIRPERSON HAHN:

Thank you. Any other questions? Legislator Trotta.

43 44

41

#### LEG. TROTTA:

So if my cesspool goes tonight I couldn't get one of these in tomorrow? If I wanted to pay for it myself, could I --

47

45

#### MR. SCULLY:

It would require a permit. You need to go through a permitting 49 process.

11:18AM 50

#### LEG. TROTTA:

So it would take four to six weeks. 53

54

51

#### MR. SCULLY:

I think Mr. Dawydiak was talking about a scenario under which

somebody came forward for a grant application and --1 2 LEG. TROTTA: 3 Today I go home and my basement's flooded. I want to put one of these systems in. Could I have it put in tomorrow? MR. DAWYDIAK: 7 Currently the state of the regulation is that you could not. You would need to --11:19AM 10 LEG. TROTTA: 11 Okay. What says I cannot? Because that's a big problem. 12 MR. DAWYDIAK: 14 Public Health Law advanced treatment units require --15 16 LEG. TROTTA: 17 I could put regular cesspools in that would pollute my groundwater 18 to no end, no problem, I can do it? 11:19AM 20 MR. DAWYDIAK: 21 This is an anomaly which has not escaped our attention. 22 23 LEG. TROTTA: 24 25 Well, this is the most important thing of the whole thing, because if we did this -- if there's some wealthy people out there who say I want to do this, and I want to do this tomorrow, why can't we do it? And how do we get this so it's done? Because we're just wasting time here. This is the most important factor right now, what we're talking about, way more than the 400 with the borrowing 11:19AM 30 the money. We need the ability to do this tomorrow. So who -- is it the State law that says this? 33 MR. DAWYDIAK: 34 Correct. This would require some changes at the State level. 35 36 LEG. TROTTA: 37 Specifically what is the law that says we can't do this? 38 39 MR. DAWYDIAK: 40 State Sanitary Code. 41 42 LEG. TROTTA: 43 And it says what? 44 45 MR. DAWYDIAK: 46 Advance treatment units require a design professional to design and 47 propose them and they need to be approved either by the State or local Health Department. 49 11:20AM 50 LEG. TROTTA: 51 Is that -- say that again. By the State or the local Health 53 Department. 54

MR. DAWYDIAK: 55

In our case we have a full service local Health Department, so

<sup>\*</sup> Index Included at End of Transcript

In some counties the State reviews we're the agent of the State. and approves these directly.

#### LEG. TROTTA:

Okay. So Mr. Scully just said a minute ago that we're waiting for a unique price, 17, 18, \$15,000, whatever it is. Clearly that's going to be a cookie cutter system that goes in boom. So my question to you, now you said we have a Health Department that we could say if my cesspool went tonight, there's a cookie cutter for \$17,000 that I could have put in tomorrow. So does the County have the ability to make that decision that tomorrow it could be put in.

11:21AM 10

## MR. DAWYDIAK:

Currently for an advanced treatment unit that ability does not 14 exist.

16

12

13

#### LEG. TROTTA:

17 Why not? You just said it's the County -- we have our own County 18 Health Department. 19

20 21 22

# MR. DAWYDIAK:

State Sanitary Code requires an engineering plan preparation and submission by a design professional.

23 2.5

27

#### LEG. TROTTA:

Okay. So if the cookie cutter system that we're going to be for \$18,000 is designed and it's a generic design, can we -- I mean, in Rhode Island, to the gentleman from Rhode Island, does that happen in Rhode Island?

11:21AM 30

#### MR. JOBIN:

No, it does not. Rhode Island is very similar to New York where a design professional is required to do a site plan and submit it to the State for review and permitting. The thought process is in protection of public health, that the Health Department or local State jurisdiction needs to look at the plan, make sure you're meeting the setbacks to groundwater in other areas and then sign-off.

38 39 40

#### LEG. TROTTA:

You know how ridiculous this is, because you're telling me I can put in a cesspool tomorrow and pollute everything, but I can't put the thing in.

43 45

41

#### MR. JOBIN:

I'm not arguing with --

47

49

#### LEG. TROTTA:

11:22AM 50

So how do we change -- you're saying now that the County Health Department does not have the ability to say here's a design, it's a cookie cutter, it's going to go into a neighborhood. Let's say it's in Commack, it's not near the groundwater. We still can't do that?

53 54

#### MR. DAWYDIAK:

Legislator Trotta, you're correct. We would love the ability on

5/8/2017 EPA Committee simpler sites to have this more streamlined. This is a conversation that we are having with the State Health Department --2 LEG. TROTTA: But you just said -- you said the State Health Department, I don't know if you used the work defers, but defers to the County Health Department. 7 MR. DAWYDIAK: 9 To implement its regulations. We can't change their regulations. 10 We're a subordinate governmental entity with delegated authority. We can't be any less stringent than they are without their permission. 14 LEG. TROTTA: 15 So how do you get their permission? 16 MR. DAWYDIAK: 18 We would have to have a change in the State Sanitary Code. basically State Public Health Law and the associated sanitary --11:22AM 20 21 LEG. TROTTA: 22 Is that done through the -- is that something administratively 23 done? 24 2.5 MR. DAWYDIAK: Potentially through the State Health Department or potentially 27 through State Legislation. It could be either. 29 MR. SCULLY: So just to summarize, to make sure we're clear. So we're 31 constrained. That's a constraint on us. 33 LEG. TROTTA: 34 How do you get rid of the constraint? 36 MR. SCULLY: 37 So it's either by rule making, rule making would be done by the State Health Department as an agency, or it could be done Legislatively by the Legislative body on the State level. 11:23AM 40 41 LEG. TROTTA: 42 It seems to me that this is absurd that, you know, right now as 43 we're sitting here these cesspools are being put in all over Long Island and with a stroke of a pen someone can --45 CHAIRPERSON HAHN: 47 Point of information. 48 49 LEG. FLEMING: 50 I just wanted to make a point about, you know, the Health 51

I just wanted to make a point about, you know, the Health
Department is also leading a revision group on Article 5 and 6 of
the Sanitary Code, and one of the things that that group is looking
at is eliminating cesspools, that you would never be able to
replace a cesspool with a cesspool. So you would always have to
then at least meet standard. I don't know, Peter, if you want to

address that.

#### MR. SCULLY:

No, I think that that description is accurate and I know Legislator Trotta himself has dedicated some time to that process and offered an opinion, but his observation about the benefits of having a streamline system on the State level that will allow us to move more quickly on these, that's not lost on us. That's something that's worthy of further discussion.

11:24AM 10

#### LEG. TROTTA:

It should be the number one thing because you're missing opportunities every single day. You're talking about 400. I'm talking about 4,000 that could be done. Because, you know, there's some people who can afford to do it who would do it, but they can't. It's like, you know, you're counting pennies when you're missing the dollars.

19

21

22

# CHAIRPERSON HAHN: Legislator Anker.

11:24AM 20

LEG. ANKER:

You know, I understand where you're coming from, Legislator Trotta, but I think this is the process. Unfortunately sometimes it takes a lot longer, and I think there has to be a certain amount of vetting, because we don't want the wrong systems at the wrong places. So, again, I appreciate all of the work, and I think Suffolk County, from what I understand, you are leading this. You are leading the ability for our water to be cleaner, at least in the future. We have a lot of remediation that we're working on as we speak, whether they're Superfund sites or illegal dumping. And, again, I'm very happy and proud that, you know, our staff, and you guys are here to make sure that our water will remain safe.

Actually I brought it up and I made the observation, and Legislator

11:25AM 30

#### CHAIRPERSON HAHN: 35

Trotta left, but I think, you know, he clearly has State representatives who could be very influential. Rob, you clearly have State representatives who could be very influential in the process, so we welcome, you know, your assistance as we move 11:25AM 40 forward to try to streamline this. Because I made the observation and that I've always pointed out that, you know, making sure that when a system fails we lose -- it's 30 years we lose potentially, because what's going in the ground we could lose 30 years of better treatment. And so, you know, just making sure that each turnover opportunity is maximized is very important to us because people -most people don't think about their waste or those with cesspools and septics don't think about it until it fails and won't think about it until it fails despite our best efforts unless we mandate 49 in certain zones. But, you know, certainly finding a way to streamline and properly investing in staff to being able to streamline and making that possible will be very important as we

11:26AM 50

56

move forward, but we need the assistance of the State Government

and we will welcome your efforts to help us.

## LEG. TROTTA:

It sounded like it didn't need to be legislative, it could be just the Health Commissioner of the State of New York State says we're changing this. Is that true?

5

## **CHAIRPERSON HAHN:**

Either or.

7 8 9

## MR. SCULLY:

11:27AM 10

It sounds to me like if it's in regulation that's what we call a rule making. It's more involved than a simple executive decision by an administrator, because the State Procedures Act lays out a process by which they have to go through rule making, which is a little bit complicated.

14 15 16

### CHAIRPERSON HAHN:

17 And very lengthy.

18

20

21

## MR. SCULLY:

But, you know, it's worth having a conversation with folks on the State level do see what if they can do, and then it's important to provide context. In most states this is State Government that's doing the work that we're doing here today, right. This is an unusual situation in which Suffolk County finds itself, you know, bearing the brunt and doing all the work to get this job done. So getting State folks more involved in the policy pieces that can make this more effective I think is a good idea.

272829

## LEG. TROTTA:

11:27AM 30

Maybe the State could just give us the ability to make that decision.

31 32

## MR. SCULLY:

34 That's an interesting suggestion.

35

## 36 CHAIRPERSON HAHN:

You said it. Presiding Officer Gregory.

37

## P.O. GREGORY:

11:27AM 40

Okay, again, back to the cost. I had asked you that question about cost. You just mentioned in your conversation to Legislator Trotta you have to get a design professional because there has to be a permit now. So in my mind I'm hearing all right, you've got to get a permit, so you got to get an engineer, you have to get plans, you know. I met a woman who she had to pay \$5,000 just to get an expeditor to get a permit through the town. To me that's just, you know, potentially thousands of dollars, or certainly hundreds of dollars, just -- I mean, so what are we -- I mean, we have to be upfront and honest with these people.

49 50 51

47

There should be some type of pamphlet that says this is your anticipated monthly cost for electricity, this is your yearly anticipated cost for maintenance, you are going to need a permit, \$500 or \$250 with the town to get the permit. You got to get the plans, they're generally \$500. An engineer or an expeditor to go through the town, that may be \$7,000. I mean, we got to, you know,

we got to be laying out as plain and simple as possible because people come to us, you're being dishonest, you put this system on me, I don't know, I'd rather have my old system, I'd rather pay \$300 or \$500 every six months to get it pumped out again than deal with the cost of putting this new system in place.

6 7

16

19

212223

People are frustrated with costs. I think everyone is concerned about the environment, but I think everyone is pinching pennies, and if they had to make a decision whether to protect the environment or protect their pockets, they'll probably protect their pockets before they're concerned with protecting the environment. So we shall lay these costs out as much as possible, be as straightforward as possible, you know, or this is going to become a nightmare.

11:29AM 10

MR. SCULLY:

I think every point that you just made is one that we've been discussing over the past six months, and the importance of doing just what you suggested is critical. If we're not able to do that the program won't be successful and people will recoil away from the use of these systems, so we can't afford not to do that.

11:29AM 20

So let's go back to the opening part of your comments about the additional costs that are part of the process. Those are all considered in what staff is now offering as their best estimate of the cost of an installation. And you're concern about permitting cost and design cost I think are legitimate. So unlike in other states, we're required to have a licensed design professional, and part of the procurement that we're doing now is going to be asking, you know, engineers to provide us with six -- fixed cost for folks so that they're not subject to the whims of the market in terms of And we certainly want to provide the type of precise information that you're suggesting we should to potential applicants, recognizing that even though this is a voluntarily program, there needs to be predictability and consistency on price. We can't have folks going out into the market and finding that they face expenses that are far in excess of what has been forecast or the program won't be successful. Those concerns are legitimate concerns.

11:31AM 40

38

49

54

11:30AM 30

LEG. TROTTA:

Just some quick numbers. The most important thing in this whole system is being able to put it in quick, because I just did a two percent of them fail a year, cesspools, a year. That's 7200 cesspools. So you're talking about doing 400. So I would stop what you're doing, everything to do with this whole 400 house plan, and work on getting a generic system put in where we can offer it to every citizen in this County where, hey, if you want to do this, you can have it done tomorrow. Because when my cesspool went five years ago, in an hour they were digging a new one. You need that flexibility or this will never work. You should stop doing this whole 400 house plan and continue this. Two percent is 7200 houses. You're talking about 400.

11:31AM 50

## **CHAIRPERSON HAHN:**

56 Do you know how many of the two percent are in the critical --

```
priority critical areas?
          LEG. TROTTA:
          At least 400 would be.
          CHAIRPERSON HAHN:
          Do you know?
       7
          LEG. TROTTA:
       9
         That's a generic 2%.
11:32AM 10
          CHAIRPERSON HAHN:
          Okay. I'm asking the question.
          MR. SCULLY:
          I don't think anybody here could guess. Obviously we're looking --
      16
          we're in a situation now where the current regulations don't
          regulate replacements in kind and in place. We don't require
          permits, we're not really -- we can't -- we don't have good,
          accurate data about replacements because they don't regulate that
11:32AM 20
          activity. We can work with the industry and get estimates about
      21
          how many systems are replaced. It all speaks to moving away from a
          system that doesn't really give us a lot of knowledge and control
          over what's going on out there other than realizing that these systems are not having a very good effect on the environment
          towards a more regimented system. You can't avoid that and get the
          same job done at the same time.
      27
          And to the extent that Legislator Trotta has fixed on an issue that
          really needs to be addressed about the potential to streamline the
11:32AM 30
          process, I think that it's a good thing to focus on how you might
          get that done, but to suggest that we should stop everything that
          we're doing and focus on that when we don't have the unilateral
          ability to make that change.
                                         It has to be made at the State level.
      35
          LEG. TROTTA:
      36
          If you stopped focusing on the 400, and to answer Kara's question,
      37
          7200 -- I don't know that 2% go a year, but if 2% do go a year,
          probably the ones that are going are in the low groundwater areas.
          So I would say the most important thing for what your organization
11:33AM 40
          does --
      41
          CHAIRPERSON HAHN:
      43
          I prefer to work with facts.
      45
          LEG. TROTTA:
          The fact of the matter is --
          CHAIRPERSON HAHN:
      49
          So let's not just pull numbers --
11:33AM
      50
      51
          LEG. TROTTA:
          You're counting pennies when you should be collecting dollars.
          the way to do this is to give the ability to the people to work
          fast and get this done quick. We're missing it.
```

## CHAIRPERSON HAHN:

And part of that is ramping up this whole industry, this whole government, you know, operation that has to help make it happen.

And so, you know, making sure that we're getting this done in a very strategic and thought through way in order to get to a place where we can have 7200 new systems going in a year we need to, you know, do the 400 first and make sure we're doing the 400 properly.

The last thing we want is to have 7200 trying to get done and it being a complete disaster because we can't handle it. So there certainly, you know, a sense of getting going slowly to this as well.

12 13 MR. SCULLY:

11:34AM 20

11:35AM 30

11:35AM 40

41

43

48

49

50

21

27

Right. Well, I mean I think that you need to keep in mind what we're talking about here is a voluntarily program. We -- reserving that 7200 systems might fail a year and maybe they should be replaced, I think that's a good discussion to have. In the context of the Article 5 and 6 working group we've been impressed by Legislator Trotta's appetite for increased regulation of the situation and we look forward to discussions of, you know, changes to Article 6, but as things stand right now there's no regulation in place that would require any of those 7200 theoretical homeowners to replace their system with an IA. We might get there, but we won't get there without the support of the Legislature.

## **CHAIRPERSON HAHN:**

Legislator Fleming.

## LEG. FLEMING:

I just wanted to just suggest that I agree 100% that we need to move the systems -- the permitting process more quickly and I think that's a goal that everyone recognizes. I'd like to work together with you, Rob, on getting the State to get rid of this engineer certification. I mean, I think a bipartisan approach to our State representatives might be more successful and would serve the purpose not just for this particular effort, but for moving forward. It's just one more sort of band-aid on our government that is costing us money, costing our constituents money, costing our constituents time, doesn't make any sense. It was enacted by someone far away. And if you want to work with it -- with me on it, let's do a bipartisan effort and try to get them to change it.

## LEG. TROTTA:

Absolutely. I think you should take the word permit out of it. It should be a generic cookie cutter for most of these systems. I'm sure there's some specific locations where it might be different, but we're missing opportunities every single day we're not doing this.

## LEG. FLEMING:

Well, that I'm going to -- I have to disagree with you on because if there's no permit -- if there's no oversight at all, these aren't set and forget systems as Mr. Jobin said. These are systems with mechanics in them, and if they fail we're in worse situation than we were before.

56

### 5/8/2017 EPA Committee

Hold on one second. I just want to applaud the effort that's been made by the Health Department to date to pilot the programs, to make sure they work. We don't want to just rush into something with all the best intentions and end up with a worse situation than we have. One of the reasons why we have the situation we do is because the County Health Department has turned a blind eye, no offense, from time to time to systems that are polluting our water 7 and we're in a crisis now, so we've got to move forward.

10

### LEG. TROTTA:

Things have been out there for 25, 30 years.

11 12 13

14

## CHAIRPERSON HAHN:

To the point of the electricity and the system being complicated and electric. I have a resident at home, listening in from home, yes, people do do that, asking what happens when the power goes out.

17 18

21

## MR. JOBIN:

11:37AM 20

That's a great question. For power outages four of the -- three of the four approved technologies will flow through by gravity. They won't provide treatment, but they will function in times of power outage. One of the other systems does have a pump in it, so we've been allowing gravity bypasses during -- for the event of power outages.

The other thing is the systems have a two to three day surge 27 capacity, so if there is a power outage they can handle that flow for two to three days. But we have been following up with between looking at generator transfer switches and gravity bypasses for 11:37AM 30 those, but most of the systems are straight flow through. treatment will go away. You won't have treatment for the two or three days that you're without power, but the water will

hydraulically move through the system.

35 36

## **CHAIRPERSON HAHN:**

But we're approving the ones that don't?

38

## MR. JOBIN:

11:38AM 40 41 We're approving them with gravity bypass or generator transfer switch.

## CHAIRPERSON HAHN:

Okay. Thank you.

45

### MR. DAWYDIAK:

Just for the interest of full disclosure, Legislator Hahn. There may be some small universe that will not flow in the event of an extended power outage. Justin mentioned a generator connection. 49 homeowner can opt to install a generator for those. You're looking at solar or battery operated lift pumps for short-term surges. 11:38AM 50 Again, the great majority of these are being directly engineered so that they won't fail in the event of an extended power outage. An engineer would advise a resident in situations and options where that may not be possible.

## CHAIRPERSON HAHN:

And do we have a requirement for notification of a homeowner for the ones that don't provide that gravity flow? Like so that they know when they're purchasing it that that is possible?

7

## MR. JOBIN:

They are required to register the systems upon approval from the Health Department, so we would notify them as to that. I just want to say all the systems that have gone in the ground as part of the demo program have required to have a gravity bypass or a generator hookup, and the homeowners are aware of that so we anticipate that continuing moving forward.

12 14

10

## CHAIRPERSON HAHN:

I just want to make sure that there's a homeowner notification of those that don't -- doesn't come with it and that it's required.

18

19

21

## MR. JOBIN:

11:39AM 20

Yes. That would be in their annual operation and maintenance It would be there and it would be notified with the registration upon approval of the system. The manufacturer under our Article 19, the manufacturer is required to give the homeowner a packet upon installation that goes through the do's and don'ts, the operation and some of the key points.

### CHAIRPERSON HAHN:

It might be something that they need to initial.

27 29

## MR. JOBIN:

11:39AM 30

Absolutelv. They have to sign-off on that contract.

## CHAIRPERSON HAHN:

I mean that specific point, that there's a little box and that they understand that in case of a power outage, you know, da da da. just think that that's significant enough that we might need to go to an extra step. We can talk later about how we would do that, legally requiring that in the contract process.

11:40AM 40

38

Any other questions? Okay. Thank you very much for your presentation. The amount of work that this department has completed in the last five and a half years has been, you know, extraordinary, and it's because of the efforts of all four of you plus so many others behind you, you know, to make it happen, and we all want to thank you for that.

45

### LEG. FLEMING:

Madam Chair, can I make a motion to take out of order 1262?

49

### CHAIRPERSON HAHN:

11:40AM 50

Sure thing. I'll second. All those in favor? Opposed? Abstentions? 1262 is before us. IR 1262 - Adopting Local Law No. -2017, A Local Law to establish a grant assistance program for the installation of Innovative and Alternative Onsite Wastewater Treatment Systems (Co. Exec.).

54

I'll make a motion to approve. Seconded by Legislator Fleming.

## 5/8/2017 EPA Committee

Anyone on the motion? All those in favor? Opposed? Abstentions? 1262 is approved. (VOTE: 6-0-0). Thank you.

3

2

## TABLED RESOLUTIONS

7

Now we are on to Tabled Resolutions. Introductory Resolution 1003 - Authorizing appraisal of land under the Suffolk County Drinking Water Protection Program, as amended by Local Law No. 24-2007, North Fork United Methodist Church Town of Southold (SCTM No. 1000-025.00-02.00-023.002) (Krupski).

11:41AM 10

## LEG. KRUPSKI:

Motion to table. 13

16

17

12

### CHAIRPERSON HAHN:

Motion to table by Legislator Krupski; seconded by myself. All those in favor? Opposed? Abstentions? 1003 is tabled. (VOTE: 6-0-0-0

18 19 20

#### INTRODUCTORY RESOLUTIONS

21 22

23

Introductory Resolution 1272 - Authorizing an appraisal for the Purchase of Development Rights of Farmland under the Suffolk County Drinking Water Protection Program, as amended by Local Law No. 24-2007 - Rottkamp's Farm Property - Town of Riverhead (SCTM No. 0600-061.00-02.00-007.001p/o)(Krupski).

27 28

29

## LEG. KRUPSKI:

So moved.

11:41AM 30

## **CHAIRPERSON HAHN:**

Motion by Legislator Krupski; seconded by myself. On the motion. Director Lansdale, welcome back.

35 36

33

## **DIRECTOR LANSDALE:**

37 11:42AM 40

The farm property is located in the Hamlet of Calverton, Town of Riverhead. It's 21.3 acres in size, of which 19.5 acres is proposed for the purchase of development rights. Property is currently planted in food crops including corn, tomatoes, melons, asparagus, pumpkins and squash. The property received a rating of 18.25 out of 25 points. A score of ten or higher is used as the standard minimum threshold for recommendation for inclusion in the County's PDR Program. It received points for location adjacent to a farm PDR, long road frontage, prime soils and it's also located

within an agricultural district. This property was reviewed by the Farmland Committee at the March 16th meeting and was recommended 47

for your consideration.

11:43AM 50

Oh, there's also a proposed cutout of 1.8 acres located in the southern portion of the property. The entire property is zoned agriculture protection zone with a minimum lot size of two acres.

51 52 53

49

## **CHAIRPERSON HAHN:**

Any questions? We have a motion and a second. All those in favor? Opposed? Abstentions? 1272 is approved. (VOTE: 6-0-0-0)

56

```
We did 1274 earlier.
```

1291 - Authorizing the acquisition of land under the New Suffolk County Drinking Water Protection Program (effective December 1, 2007) - open space component - for the Bradt property - Hauppauge Springs - Town of Smithtown - (SCTM Nos. 0800-154.00-05.00-015.000 and 0800-154.00-05.00-017.000) (Co. Exec.). 7

## LEG. KRUPSKI:

So moved. 11:43AM 10

9

11

12

16

17

21

27 28

29

31

36

37

41

43

45

47 48

49

50

52

11:45AM 40

11:44AM 20

## **CHAIRPERSON HAHN:**

Motion by Legislator Trotta; seconded by Legislator Krupski. 0n 13 the motion, Director Lansdale.

## **DIRECTOR LANSDALE:**

Great. These two parcels are located on the south side of Veterans Memorial Highway east of Old Willetts Path in the Hamlet of Hauppauge, Town of Smithtown. Lot 15 is 4 point acres in size, lot 17 is 1.8 acres in size. So the total possible acquisition is 6.6 acres. The parcels that have numbers associated with them are the two parcels in question that are closest to Veterans Memorial Highway. It is part of an assemblage area known as Hauppauge Springs that was listed in our Master List. It has received 47 points for freshwater wetlands buffer area, a freshwater pond, habitat diversity, location adjacent to County and town parkland. That's my report.

## **CHAIRPERSON HAHN:**

Excellent. Legislator Krupski. 11:44AM 30

## LEG. KRUPSKI:

32 Thank you. So as far as the funding goes, there was money for some 33 of the towns under the 12-5D and 12-5E Program. Does this -- is there any money out of those programs that would?

## **DIRECTOR LANSDALE:**

So Smithtown, this is in the Town of Smithtown, and there's no money available through that program. The Town of Smithtown was quick to act when the funding was available and has used all of its funding.

## LEG. KRUPSKI:

Okay. Thank you. And also is there any, now that you have a larger assemblage of open space, and there's an awful lot of development certainly around here, any proposal to do a trail system through this because it is -- it looks like high quality swampland.

## LEG. TROTTA:

It's a swamp. 51

#### LEG. KRUPSKI: 53

But, I mean, you could use it for ice skating, certainly, you could catch frogs, whatever. You know, I mean, is there -- you know, 54 people are looking for open space and most open space is used by

people who live adjacent to or near walking distance to it and this seems like an ideal place where public land could be, you know, people could have a path through the woods.

## MS. FISCHER:

Yes, actually there are some trails existing at the present time that you can walk through the property, also near to the ponds. They're beautiful ponds, actually, amazingly so in the high traffic area that it exists. And it's -- would be for passive recreation and certainly trails and passive uses would be in line with acquisition.

11:46AM 10

## LEG. KRUPSKI:

That's great. Thank you.

### CHAIRPERSON HAHN:

Any other questions? Okay. We have a motion and a second. All those in favor? Opposed? Abstentions? 1291 is approved. (VOTE: 6-0-0-0)

Introductory Resolution 1322 - Making a SEQRA determination in connection with the proposed Suffolk County Sewer District No. 1, Port Jefferson, Pump Station Force Main, (CP 8122), Village of Port Jefferson and Town of Brookhaven(Pres. Off.). Motion by myself; second by Legislator Anker. All those in favor? Opposed? Abstentions? 1322 is approved. (VOTE: 6-0-0-0)

Introductory Resolution 1323 - Making a SEQRA determination in connection with the proposed Suffolk County Sewer District No. 5, Strathmore Huntington, Lagoon Remediation, (CP 8115), Town of Huntington (Pres. Off.). I'll make a motion; seconded by Legislator Krupski. All those in favor? Opposed? Abstentions? It is approved. (VOTE: 6-0-0-0)

Introductory Resolution 1324 - Making a SEQRA determination in connection with the proposed Suffolk County Sewer District No. 6, Kings Park, Rerouting and Pump Station Expansion, (CP 8144), Town of Smithtown (Pres. Off.). I'll make a motion -- motion by Legislator Trotta for this SEQRA in Kings Park. Motion by Legislator Trotta; seconded by Legislator Krupski. All those in favor? Opposed? Abstentions? 1324 is approved. (VOTE: 6-0-0-0)

11:47AM 40

Introductory Resolution 1325 - Making a SEQRA determination in connection with the proposed Suffolk County Sewer District No. 20, William Floyd, Improvement and Expansion, (CP 8148), Town of Brookhaven. (Pres. Off.). Motion by Legislator Muratore; second by Legislator Krupski. All those in favor? Opposed? Abstentions? 1325 is approved. (VOTE: 6-0-0-0)

11:48AM 50

Introductory Resolution 1361 - Accepting United States Department of Agriculture Natural Resources Conservation Service Regional Conservation Partnership Program (RCPP) funds, and appropriating funds in connection with the Reclaim Our Water Agricultural Stewardship in the Peconic Estuary Watershed Project(Co. Exec.). Motion by Legislator Krupski; seconded by Legislator Fleming. On the motion. Does anybody want to describe a little bit? I mean,

it sounded terrific from what Rob Carpenter had said and we're really excited about it.

3

16

21

27

### LEG. KRUPSKI:

If we could just have Corey Humphrey and Auggie to come up here just to give a brief description. I think it's a program that they worked an awfully long time on. And it was one of those programs that when it came through everybody was pleased and surprised. It just continues with the, you know, the commitment of the County to work with the ag community to keep improving their use of nutrients. It's just an ongoing effort. There's a lot of partners involved and it just keeps moving the ball forward as far as nutrient management in agriculture.

11:49AM 10

### **DIRECTOR LANSDALE:**

So I want to thank all of the partners who are with us here today, and especially Auggie Ruckdeschel as well as Corey and the Farm Bureau for working together. Just to give you a brief description, this is the Regional Conservation Partnership Program. It's a United States Department of Agriculture Natural Resources Conservation driven program that offers opportunities for conservation partners as well as agricultural producers to work together to expand that conservation mission and demonstrate the value of voluntary private lands conservation.

11:49AM 20

So the partners worked very closely in coming up with the scope of this. We are accepting -- the resolution before you today is accepting \$1.2 million in grant funding. Four-hundred and forty-seven thousand will be used to provide technical assistance, and that's what's specifically described in this accepting resolution today. And that will provide technical assistance to agricultural producers within the Peconic Estuary Watershed, specifically to develop and certify nutrient management and integrated pest management plans.

11:50AM 30

11:51AM 40

11:51AM 50

## CHAIRPERSON HAHN:

And I know that those had been -- I mean, clearly this Sustainable Agricultural Management Program, I mean, I know we were working on it when Vivian was a Legislator and I was working in her office, 2004, 2005 and even, you know, earlier than that, and so these are tremendous -- well, that might be a big word. I don't want to use the word huge, either. But it's a big cost for these plans and maybe one of the barriers to full participation by the agriculture community. So I think that this is a real win to be able to help fund those plans which are incredibly important to this success of

45 46 47

49

37

### DIRECTOR LANSDALE:

this program.

And in addition, this is consistent. This work program as proposed today is consistent with a resolution that was unanimously adopted by this Legislature a year or two ago adopting the agricultural stewardship plan that was a resolution introduced by Legislator Krupski.

53 54

And I just also want to just briefly mention all of the partners who are involved in this project that's before you today. In

## 5/8/2017 EPA Committee

addition to the Suffolk County Department of Economic Development and Planning, there is also the Department of Health Services that are -- that's involved as well as the USDA, the Soil and Water Conservation District, Cornell Cooperative Extension, the Peconic Estuary, United States Geological survey, Long Island Farm Bureau as well American Farmland Trust. This is really a partnership.

## **CHAIRPERSON HAHN:**

11:52AM 10

Yeah, and I know -- I have taken some of the farmland tours that Cornell has done as well about their integrated pest management practices, their delayed release fertilizer demonstration projects, pheromone, you know, all kinds of things that Cornell -- will farmers be able to utilize a lot of those, the results of all that research that Cornell has done, we'll be able to continue to implement and even, you know, more aggressively implement now?

## **DIRECTOR LANSDALE:**

11:53AM 20

Yes. This will build upon the existing great work of these organizations and leverage that. And what's unique about this is that you'll be able to then -- farmers will be able to access funding towards the implementation of some of these plans.

## **CHAIRPERSON HAHN:**

Excellent. Great. Any other questions? Terrific. We have a motion and a second. All those in favor? Opposed? Abstentions? And I'd like to co-sponsor. So that one's approved. Thank you. (VOTE: 6-0-0-0)

11:53AM 30

Seeing that we have no more business before the committee, we are adjourned.

 (\*The meeting concluded at 11:53 a.m.\*)

It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 It [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 It [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 It [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8, 13:39, 13:41, 13:49,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44, 44:51, 45:9, 46:6,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8, 13:39, 13:41, 13:49, 13:51, 13:52, 13:53,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44, 44:51, 45:9, 46:6, 46:19, 46:42
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8, 13:39, 13:41, 13:49, 13:51, 13:52, 13:53, 13:54, 14:16, 14:17,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44, 44:51, 45:9, 46:6, 46:19, 46:42 its [4] - 2:39, 31:42,
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8, 13:39, 13:41, 13:49, 13:51, 13:52, 13:53, 13:54, 14:16, 14:17, 14:20, 14:31, 14:54,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44, 44:51, 45:9, 46:6, 46:19, 46:42  its [4] - 2:39, 31:42, 35:10, 44:40
It [20] - 16:30, 18:34, 18:49, 20:27, 21:51, 22:45, 28:46, 29:39, 32:38, 32:49, 35:28, 35:43, 37:2, 37:10, 39:22, 39:34, 40:39, 44:23, 45:33, 46:8 it [160] - 2:40, 3:15, 3:22, 3:23, 3:24, 4:17, 4:23, 4:52, 5:11, 5:15, 5:30, 6:21, 6:24, 6:28, 7:7, 7:16, 8:10, 8:14, 9:1, 9:31, 9:51, 10:43, 10:51, 11:2, 11:48, 12:5, 12:13, 12:40, 12:48, 12:51, 13:1, 13:3, 13:7, 13:8, 13:39, 13:41, 13:49, 13:51, 13:52, 13:53, 13:54, 14:16, 14:17,	11:38, 11:42, 11:47, 12:24, 12:56, 13:1, 13:39, 13:43, 13:44, 13:52, 14:19, 14:29, 14:32, 15:18, 15:22, 16:35, 17:39, 17:46, 18:30, 19:22, 20:53, 23:34, 24:19, 24:27, 24:28, 24:31, 26:27, 26:47, 28:29, 28:51, 28:52, 28:56, 33:28, 34:18, 34:27, 34:50, 34:51, 34:52, 35:38, 36:16, 36:43, 37:10, 37:11, 37:20, 37:21, 39:31, 40:37, 42:16, 42:42, 43:37, 43:44, 44:51, 45:9, 46:6, 46:19, 46:42 its [4] - 2:39, 31:42,
