2 A P P E A R A N C E S :

3 WAYNE HORSLEY

4 NOEL GISH

5 CAROL GHIORSI HART

6 JAMES B. WHITTEN

7 NEIL ZOOMB

8 BILL SHILLING

9 JP DIMARTINO

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

1

2

MR. GISH: Bill, do you want to start?

3

4

5

MR. SCHILLING: My name is Bill Schilling and I'm representing Bill Lindsey, the Proceeding Officer of the Suffolk County Legislature.

6

7

8

MR. HORSLEY: Wayne Horsley, County Legislature. I chair the Energy, Higher Education and Economic Development.

9

10

MR. DIMARTINO: JP DiMartino, Internal Legislature Lindsey.

11

12

13

MR. GISH: Noel Gish, President of the Board of Trustees for the Suffolk County Vanderbilt Museum.

14

15

MS. HART: Carol Ghiorsi Hart, Executive Director of the Vanderbilt Museum.

16

17

18

MR. WHITTEN: Jim Whitten, Vice President of Workforce and Economic Development from Suffolk County Community College.

19

20

MR. ZOOMB: Neil Zoomb, representing the County Executive's office.

21

22

23

24

MR. HORSLEY: Great. Why don't we, I'll just say, welcome and then introduction of task force member, we've done that. We've done a good job of that.

25

When this was originally contemplated this

1
2 look see about what synergies there are between
3 the museum and Suffolk Community College, I think
4 the Vanderbilt was in a different spot in their
5 story. They're certainly, as everybody knows
6 here around the table that the Vanderbilt has had
7 financial difficulties and the County's going
8 through financial difficulties as well. With
9 responding to how do we afford the Vanderbilt
10 with their financial issues, while we've got our
11 own. So that was what we were confronted with
12 going back, was it last year already?

13 MS. HART: It's almost exactly a year ago
14 that things --

15 MR. HORSLEY: Boy, that went fast. The
16 problem being is and I'm sure that Noel will go
17 over this that the finances of the Vanderbilt
18 took a dive with the stockmarket and the
19 endowment. Of course, the County is facing the
20 recession. So we thought, well, maybe we should,
21 we're looking, for the County we were looking at
22 Plan C at the time and maybe you guys don't know
23 about but basically the relationship between the
24 County Legislature, the County and the college.
25 We have since split many issues with us, though

1

2 we are still their sponsor, they are, we approve
3 their budget but we approve it in mass. We don't
4 have, there's a whole lot of other technicalities
5 that go along with that as being divided.

6 So we, at that point, were thinking, well,
7 maybe there's possibilities of the community
8 college would be interested in taking on the
9 responsibilities of the museum and the like.
10 Well, since that has happened and a lot has
11 happened over the last year. One is that we see
12 the stock market is coming back to some level.
13 We are seeing that the hotel/motel tax was
14 approved, which moneys will be, which will go to
15 the museum. They are one of the major recipients
16 of the hotel/motel tax when that gets generated.
17 Certainly there have been changes in the Board,
18 the Vanderbilt and we're looking for great
19 revenues and we've got a plan in place, so things
20 have changed.

21 That all being said, there seems to be that
22 there could be synergies between the college and
23 the Vanderbilt. Classes, the possible, you know,
24 of different coursework that may be different
25 that's not offered at Suffolk Community College

1
2 that could be maybe held here at the Vanderbilt.
3 The Vanderbilt would receive revenues, I would
4 imagine this would be the case, would receive
5 revenues from the college being an organization
6 that will be here and have classes here. I think
7 that we'd be looking at the fact that the
8 community college now is brimming at the seams.
9 We've never had the number of students in the
10 history of Suffolk Community College as we have
11 right now. That issue has come up within the
12 last year that wasn't there last year. We're
13 record attendance at the college.

14 So all that being said, here we are. The
15 game has changed but maybe there is something
16 that should be discussed here. I'm not sure how
17 we get there. I haven't gotten, I don't have a
18 little man playing in my head on how we handle
19 this but I thought maybe we should still meet,
20 still discuss it because I think there may be
21 some good things that could come out of it for
22 both the college as well as the Vanderbilt.
23 How's that? Is that good? Down the road?

24 MR. GISH: I'd just like to ask the question
25 whether Jim knows of any discussions at the

1
2 college level that may have taken place
3 concerning the possibility of a merger or
4 anything that transpired that you can reveal to
5 us that's on the record?

6 MR. WHITTEN: Sure. What we have discussed
7 at this point is that we definitely want to
8 persistently support the museum as much as we
9 can. I think the College's initiative is that we
10 believe it's a viable entity for our community,
11 especially for the educational purposes that we
12 serve, the history. We certainly believe in what
13 you're doing here in your mission.

14 We are not museum people. We're educators
15 but at the same time, the message is that we
16 definitely want to be a partner or participant or
17 whatever we can do to support that.

18 As far as an overall plan or scope of work,
19 we really haven't worked that far through. We
20 haven't done that yet because we wanted to have
21 this meeting first to kind of have the discovery
22 process to see really what the issues were
23 because a lot of what Wayne just said, a lot has
24 changed over the last year. A lot has changed
25 for us too. Its been a crazy year to be quite

1

2

frank.

3

4

5

6

7

The position of the college at this point is whatever we can do to work with you to be an active partner for you and support the mission of the museum and I think that's the point we should start from.

8

MR. HORSLEY: That makes sense.

9

10

11

12

13

14

15

16

MR. GISH: That's pretty much what our discussions have been. I honestly did not see the possibility, at least at this time, for Suffolk Community College to just come in and take the entire Vanderbilt complex and make it part of the extension with the Riverhead Campus, Ammerman Campus, obviously in Brentwood, you're spread out as it is, how would we fit in.

17

18

19

20

21

22

23

24

25

Again, I looked at the schedule. I didn't know whether you have museum or tutorial (sic) or classes that are being taught at the university level but Carol and I bat around the idea that maybe that would be a good way to marry the two together, even if lightly that we put together some courses where you might have students that would come over here as interns but we thought the possibility was that we could have some

1

2 courses that would, in an ambulatory way, serve
3 Suffolk Community College.

4 We also explored the possibility of possibly
5 bringing graduate courses from Stony Brook
6 University dealing with astronomy into the
7 Planetarium. We'd like to try to make this,
8 again, a marriage between educational facilities.
9 You saw when you came in the big, yellow buses
10 that were at the top of the hill. We do a very,
11 very good job with elementary school students.
12 We have a large group in from Franklin Square in
13 Nassau County. Tomorrow we have a large group
14 coming in from Shelter Island. We service from
15 one end of the county to Nassau County as well.

16 We perform a function obviously dealing with
17 the Mummy program and with sort of world history
18 because you're looking at what he gathered here.
19 And we'll gladly look at the possibilities of
20 working with courses. And we have people on
21 staff who have taught on the college level.
22 Carol has, I think Stephanie has the ability to
23 do so if she chose to or at least be able to do
24 some lecturing on archival. She's the chief of
25 archival work. So we might be able to add that

1

2 to maybe some of the array courses that could be
3 done.

4 We might be able to find a way here to
5 provide some education space. We do have some
6 classrooms in the Planetarium. Not much room,
7 believe it or not, in the mansion. This is still
8 pretty much a destination for Suffolk County
9 residences. I mean it's a classical piece of
10 architecture. It's just doesn't exist anywhere
11 else, at least in a decorated state. It's not a
12 mansion that's been abandoned. If you go to
13 Oheka Castle, that was sort of left and they sort
14 of brought everything in in the private sense.
15 If you go to the Guggenheim, the Guggenheim was
16 sort of left and you can go in and see some rooms
17 that are there. This is really one that was put
18 together by Vanderbilt and his collections are
19 here and everything's here and this is really an
20 A-typical situation for Long Island. But we
21 would, again, gladly like to look at
22 possibilities of classes that might take a look
23 at his collections from either archaeological
24 collections, which are great. We have passenger
25 pigeons that are extinct, we could deal with that

1

2 and we have a ton of, so any courses. And again,
3 dealing with a two-year college, we would have to
4 work on putting those together and then getting
5 staff.

6 MR. WHITTEN: We do have some astronomy
7 courses.

8 MR. GISH: Right. We have one here so.
9 It's a distinct possibility that coordination
10 could be developed.

11 MR. WHITTEN: The other option we discussed
12 was the possibility of actually holding college
13 courses here in the space when it was not
14 interfering with regular scheduled museum
15 activities.

16 One of the issues for us is it would be a
17 great opportunity for the college to be able to
18 expand and move its services on the North Shore
19 because we really don't have a lot here. This
20 would give us that opportunity to have a presence
21 here, maybe reach a different audience. It may
22 be that we live in a more cultural aspect but
23 whether some of the bread and butter course that
24 we offer that people might like to take here that
25 we could offer here so they don't have to travel

1

2 to Brentwood or whatever. So that's another
3 option as well.

4 We don't want to interfere with your
5 operation. We want to be able to be supportive
6 and lend to the atmosphere and property.

7 MR. GISH: That's something we might be able
8 to look at. We do have some work that's going to
9 be done in the Planetarium when we move into the
10 star projector phase. Right now we have a GOTO
11 projector that's in there not but that's one of
12 the possibilities for us. There's a Zeiss
13 projector, there's a GOTO projector, which we
14 could go to to upgrade. The one we have is now
15 40 years old.

16 MR. HORSLEY: You are upgrading it, right?

17 MR. GISH: We are upgrading it.

18 MR. HORSLEY: Did we allocate the money for
19 that?

20 MS. HART: Yes.

21 MR. GISH: We had the consultant go through,
22 that was done in July.

23 MS. HART: A year ago.

24 MR. GISH: A year ago and it is now sitting
25 in the County Exec's office.

1

2

MS. HART: County Attorney's office.

3

4

5

6

MR. GISH: County Attorney's office. The attorney for the County Exec's office has got it and we need some signatures there to move on. We still haven't put out the RFP on it yet.

7

8

MR. ZOOMB: Who is the attorney assigned to it?

9

MS. HART: Bob Basha.

10

11

MR. SHILLING: How long has it been in the County Attorney's office?

12

13

MS. HART: Its only been there about three weeks.

14

15

16

MR. GISH: I'll go back. We had, I believe our consultant was entered in July and we finished with that in August and we --

17

18

19

20

MS. HART: The RFP was essentially through all the levels, purchasing and whatever, everything has taken about five times longer than --

21

22

MR. ZOOMB: The County Attorney's office isn't working on the RFP?

23

MS. HART: They're reviewing it.

24

25

MR. GISH: There has not been, I have set up a schedule to be very honest with you that was

1

2 very aggressive and Karen, Cathy --

3 MR. ZOOMB: Coppinghimer?

4 MS. HART: Yes.

5 MR. GISH: Yes. Said that my schedule was
6 aggressive but I tried to, at least in July to
7 establish a schedule in which we would get that
8 done very, very quickly and then move to possibly
9 have it on site by June, July, August, which
10 would be the downtime for school groups, with the
11 hope of the potential opening in October of 2010.
12 That was my hope at that stage of the game
13 because we needed some time to get the RFP out,
14 get responses from GOTO and Zeiss and few of the
15 others working around and then to move on it.

16 MR. HORSLEY: GOTO is a company?

17 MS. HART: GOTO is the manufacturer.

18 MR. HORSLEY: Like --

19 MS. HART: Well, in the County that's what's
20 happened so the star projector was made by GOTO
21 and just get on the record because all the
22 companies will be reading this, it's going to be
23 an open RFP. It could be that GOTO gets the job
24 or it could Zeiss or could be --

25 MR. HORSLEY: I just --

1

2

MS. HART: Or it could be Megastar.

3

4

MR. ZOOMB: What's the current schedule then? I guess its changed from opening in October?

5

6

MS. HART: Yes.

7

8

9

10

11

12

13

14

15

16

17

18

19

MS. HART: 12 months to manufacture.

20

MR. GISH: To manufacture. It's not an --

21

MR. ZOOMB: They custom build?

22

23

24

25

MR. GISH: Yes, for the dome, depending on the size of the dome you have. But once that's in place and since we're going to be refitting that, to get back to the original question,

1

2 classrooms can be adapted in that Planetarium
3 that might suit college level --

4 MS. HART: We have a number of classroom
5 spaces. During the day, we max out some days.

6 MR. WHITTEN: What are the sizes of the
7 classrooms?

8 MS. HART: They're not larger than probably
9 36 absolute.

10 MR. WHITTEN: That's perfect. 35 is --

11 MR. HORSLEY: Not like Farmingdale where
12 there's 45 kids in the classroom.

13 MR. ZOOMB: So we're looking two years?
14 With RFP and construction, we're looking at
15 two years out?

16 MR. GISH: To be very honest, not to play
17 any games that is where I'm considering. I'm
18 considering next October, not October 2010
19 but 2011 with the same downtime. I'd still like
20 to avoid not having it closed during the winter
21 time. Number one, we're --

22 MR. WHITTEN: All the school problems.

23 MR. GISH: I'm trying to maximize the number
24 of kids that will come in because that for us is
25 revenue generation and that's my thinking. I'm

1

2

trying to be closed in those summer months.

3

Number one, when construction would be easier and

4

then to be open as soon as the school groups

5

begin.

6

MS. HART: That's not happening imminently

7

but we do have some during a day like today where

8

we're very busy with the elementary school kids,

9

middle school kids. In evening, however, we

10

rarely use the space so evening classes would be

11

perfect. We have at least six wonderful spaces.

12

(Whereupon, all parties began speaking at

13

once.)

14

MR. HORSLEY: I think that this

15

relationship --

16

MR. WHITTEN: -- great possibility.

17

MR. HORSLEY: Once this place gets much

18

busier.

19

MS. HART: I would love to --

20

MR. HORSLEY: Once you draw people here,

21

they come back and there's all sorts of --

22

MR. GISH: One of the things we've done just

23

recently, this was really Carol's proposal, is

24

that one of the cottages that we have on the

25

property that is not used is now going to be

1

2 offered in the evening for crafts. It would not
3 be in the college end but we're moving to better
4 utilize the facilities during evening hours with
5 adult classes in painting and watercolor and also
6 framing store and possibly an additional gift
7 shop that we'll open.

8

9 MR. HORSLEY: Does the college have an arts,
10 what's the arts' program look like at the
11 college? Do they have a continuing ed?

12

13 MR. WHITTEN: No. We have an arts program.
14 We have a very strong theater program as well,
15 theater arts.

16

17 MR. HORSLEY: That's what I thought.

18

19 MS. HART: There's a number of different
20 synergies. One would be the straight out
21 classes. I taught at Farmingdale University,
22 I've taught anthropology. There's a couple of
23 anthropology course that I've taught here, intro
24 to five field course, where I could make such
25 good use of the artifacts and facilities.

26

27 MR. WHITTEN: Great lab here.

28

29 MS. HART: Yes. In the archeology,
30 cultural, so I would love to, when I thought over
31 there, I haven't taught since I came back here

1
2 but I would bring a class over for one day to
3 have the facility to use in addition to just the
4 space. Certainly for anthropology and then those
5 courses over there were popular because they
6 filled a cultural distribution and things like
7 that. We can use the Planetarium. Again, we
8 could magistrate astronomy but astronomy, we
9 could get our cultural distribution as well as
10 your science distribution or archaeoastronomy
11 combining some of my background with the science,
12 so we could do some really unique things here.

13 MR. WHITTEN: My question for you was around
14 green and environmental. Anything that is
15 green-related is a hot topic. You have this
16 beautiful coastline here. Anything green,
17 ecology, environmental that we would relate to
18 would be a great opportunity for us to use this
19 living land.

20 MR. GISH: I have a seaplane hanger I want
21 to show you.

22 MR. WHITTEN: I've been here three times and
23 I came here twice on my own.

24 MR. GISH: I still believe that's a
25 possibility.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. HORSLEY: If we look outside of the box here, having the college involved down the road, their capital programs could be included into yours. So not necessarily this is the Vanderbilt having to pay for it, the upgrades or the use because right now that's a pipe dream. But for the college down the road --

MR. WHITTEN: We have space issues. Quite frankly, we're busting at the seams. If we have places where we could hold classes that would alleviate some of infrastructure we have on our regular campus. It's a win for --

MR. HORSLEY: That was my point.

MS. HART: The Boathouse area, which is currently a closed building because it has some structural issues, the money was appropriated but has yet to be bonded. But Cornell was in there for a while doing research, as well as programing and that would certainly be a space, we've had those collaborations before, where to do environmental classes, programs and possibly research and also even --

MR. HORSLEY: We're dealing with the County and the County.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. GISH: I think the Boathouse failed in its ultimate aim of servicing Cornell but I think the seaplane hanger because of its ability to get to the water with additional things would be much, much better. The Boathouse, I'm just concerned about from a historical point of view, really probably couldn't take a lot of people at any one time.

MS. HART: For classes, it would work for small classes.

MR. GISH: It would work fine but if you're dragging in specimens from the water, it's a wooden structure and I think that's where we had the problem initially. We tried to just revitalize it because it took a beating when Cornell was in it using it in the marine. There was leaks and things like that they were doing. The seaplane hanger with a bunch of our programs --

MR. HORSLEY: You really want that seaplane hanger.

MR. GISH: I have a restaurant, there's a dinosaur exhibit I'd like too, there's a whole --

MR. WHITTEN: Can we start a culinary

1

2

problem up here?

3

4

MR. GISH: You ready for this? I am not opposed to that. I am absolutely not opposed to that.

5

6

7

MR. WHITTEN: The only reason I say that is our culinary program in Riverhead is completely over enrolled.

8

9

10

11

MR. GISH: I've gone to the one in Riverhead and I'm not opposed to looking at that as an option.

12

13

MR. HORSLEY: Think about the culinary experience being used to cater here.

14

MR. WHITTEN: As a hospitality place.

15

16

MR. HORSLEY: The place that's a hospitality place.

17

18

19

20

MR. WHITTEN: Down the road, I'm thinking down the road if there was an opportunity to have a culinary branch here that was maybe smaller and focused on hospitality and catering.

21

22

23

24

25

MR. GISH: I'll be honest with you, what would be neat about that is the fact that it would be separate and distinct from the museum. In other words, the museum would still operate as an educational institution with the tours and the

1

2

Mummy program and the Planetarium. Because the seaplane hanger is off on a separate element down near the water that's where that distinction would be. You wouldn't be getting involved with cars coming down and problems with the little kids coming across the section.

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

We've looked at every possibility for that facility and catering was one of the ones that I've walked through, I'm not going to mention names because they'll come back and haunt me but everybody who is available in catering, even from the City, Tavern on the Green all the way but I walked them all through, between nine and ten individuals to look at that and that was my goal to put dinosaurs on the second floor and make it a destination place where you could come to. So school is not completely out of the question for that because I would still like to preserve that building.

21

22

23

24

25

It's still the only private seaplane hanger on the East Coast that's still standing. People have their own seaplane hangers, this just happens to be one of them. It would still be a great place to reserve it and I'll work any way

1

2 to Monday if we could possibly find a way to use
3 that.

4

MR. HORSLEY: Maybe what we should be
5 looking at are two different effects. On the
6 college side, what coursework or what would make
7 sense, opportunity for you. And then on the
8 other side, what square footage is available that
9 could be used for classrooms so that at some
10 point we could talk together and say, well, this
11 wouldn't work for this, it wouldn't work for
12 this, do this by 2011, that kind of stuff and
13 then revenues could flow. We can work out those
14 details later.

15

MR. GISH: Maybe what we should do is sit
16 down and make sure Jim has an idea of what sites
17 are here and what would accommodate what number
18 of students, like the garage.

19

MR. WHITTEN: If there was a space, make
20 sure it's all ready, we have this room, the
21 capacity is 35.

22

MR. GISH: We could get you that.

23

MR. WHITTEN: We also need to know what type
24 of equipment is available. Do you have smart
25 carts that roll in?

1

2

MS. HART: No.

3

4

5

6

7

8

9

10

11

MR. WHITTEN: These are the things we would have to look at. What could we do to offer the classrooms, we're looking at expansion of classrooms, what do we need to do to make them similar to every other classroom. So we know that because we do it every day. We can help transform those on that level. We don't want to move them from campus to campus. We'd rather be stationary here.

12

MR. GISH: For that particular class?

13

MR. WHITTEN: You use it as best as you can.

14

15

MR. HORSLEY: Would you say, Jim, would this be a contract between the two parties?

16

17

18

19

20

21

22

23

24

25

MR. WHITTEN: Yes. We'd develop a contract, an MOU or something where we send you, we offer this many courses and if there's a shared revenue piece, how would that work. If we're a vendor here, we can rent this space from you and we hold classes. You tell us what it costs to rent that space. We'll try to figure a way to build it into our pricing model so it's, you know, we do pay for it on our campus and heating costs, things of that nature. And then look at other

1

2

areas. If you needed equipment for classrooms

3

and we had additional equipment that may help. I

4

think we have to look at --

5

MR. GISH: Yes.

6

MR. WHITTEN: It's nothing like we've done

7

before.

8

MR. GISH: We're still in the early,

9

preliminary stages of this but I would like to

10

explore all the possibilities where these might

11

be met for both. We're an educational

12

institution. Our mission is education first.

13

MR. HORSLEY: Right. And I like it. I'm

14

sure Neil feels the same way. This is the County

15

with the County. In other words, this should be

16

a cooperative. You're not bringing in Cornell.

17

If you don't like what Cornell did, you have an

18

argument between two different types of

19

organizations. We are, I can't say we're one

20

anymore but we're sponsoring, the County is a

21

sponsor of the county college as you were to

22

the --

23

MR. GISH: Right. If you know there's a

24

potential for expanding the culinary element,

25

then that becomes a moment of discussion. When

1

2

all of a sudden marine science becomes a

3

possibility for Suffolk Community College, you

4

can say, well, why don't we talk to the

5

Vanderbilt about it. That's where that marriage

6

might take place.

7

MR. WHITTEN: We currently have 18 courses

8

that are standalone courses that we're putting

9

together for a degree in environmental, forestry

10

and marine. And it's related to the energy as

11

well. These simple courses that we could offer

12

in standalone classrooms, we could launch that up

13

here.

14

MR. HORSLEY: How many students would be in

15

a class?

16

MR. WHITTEN: In that class, it could

17

probably be 20 to make it run. But we could look

18

at opportunities. Right now we're currently

19

trying to operate that in Riverhead and also in

20

partnership with Stony Brook South Hampton

21

Campus. I just can't help think who wouldn't

22

want to come and take a class here.

23

MR. HORSLEY: Absolutely.

24

MS. HART: Yes.

25

MR. WHITTEN: You might not get a lot done

1

2

but you still have a great view.

3

MR. GISH: There are campuses that attract students purely because of the way the campus --

4

5

MR. WHITTEN: The campus I worked at was basically on a peninsula in the water and there was all historic buildings. So we had a similar to this. This is beautiful and that was run as a bed and breakfast and we had a culinary program there. We had a lodging/restaurant program and we had a catering program. But it was a functioning class, students ran it. The faculty were the managers and it paid for itself.

6

7

8

9

10

11

12

13

14

MR. GISH: There is a history behind this.

15

CW Post, before it became a college, before it was a cereal, it was actually a person. CW Post College made that transformation from the State to an educational facility. I don't think we'd go to that degree but that's a possibility.

16

17

18

19

20

Dowling was Eisenhower. Eisenhower was a Vanderbilt.

21

22

MR. HORSLEY: Stony Brook University was Planting Field Arboretum.

23

24

MR. WHITTEN: I didn't know that.

25

MR. GISH: That's what it was in Nassau

1
2 County before it moved I think in '63, I think it
3 was for the opening and then it moved to Stony
4 Brook with the Melville donation of the property.
5 I believe it was around '65, somewhere around
6 there when the dinosaurs roamed the earth. But
7 '65 is when Stony Brook picked it up but that
8 again was part of that facility. So there
9 already has been some marriages between Gold
10 Coast estates and educational facilities. Even
11 though we are a museum, that's our primary goal
12 here. I think the possibility exists for us to
13 do other things. Again, we're looking at those.
14 We have done that in the past. We have the
15 meetings of the Long Island Astronomy Club, they
16 meet here and they use the Planetarium and
17 telescope already. So we'd be more than willing
18 to try.

19 MR. WHITTEN: One of the things I just want
20 to bring up as a point of reference, one of the
21 areas I oversee is our event center. On the
22 Michael J. Grant Campus in Brentwood we have a
23 field house that we use as an event center. We
24 run trade shows, events, work seminars,
25 everything goes through there. So we have a

1

2 staff that does this on a regular basis. We can
3 take that skill set though and if we wanted to
4 assist you, I know you run events here any way.

5 MR. GISH: When our tent is up.

6 MR. WHITTEN: Right. But there maybe some
7 synergy with that too in an opportunity because
8 we have people coming to us all the time and
9 sometimes we can't accommodate them. Maybe they
10 should come here or vice versa. It's a way to
11 take two community recourses and share the market
12 of that and hope we can keep the revenue here.

13 MR. HORSLEY: That seaplane thing, though, I
14 can see where your heart is.

15 MR. WHITTEN: I'm thinking seaplane hanger.
16 Parasailing in summer. Get some jet skis out
17 here.

18 MR. GISH: We had inroads from a number of
19 schools, high schools that wanted to use the
20 facility just to house their shells for rowing.
21 We just couldn't do that at the present time and
22 I would love to be able to take local high
23 schools that are going to use the Northport
24 Harbor for that to deal with that. Anything we
25 can do to drag kids in and help them, whether

1

2

it's sport wise or education wise or field trip

3

wise would be great, so I'm still looking at

4

that.

5

MR. HORSLEY: Again, it's County with

6

County. I'm sure that the County Residing

7

Officer has strong feelings about creating a

8

relationship as well as, you know, and I know the

9

County Executive is always willing to do the

10

right thing for money wise.

11

MR. GISH: This has been a County facility

12

since 1950. I think they willed 1948.

13

MS. HART: '49 we were officially

14

incorporated but it was around '49.

15

MR. GISH: The County has had this for a

16

considerable amount of time, 60 years. The

17

County put in the Planetarium in 1970. The

18

County has invested a lot of time and a lot of

19

energy in making this a designation and we have

20

never failed that. We have had, yes, we do have

21

a bad time now but the building is still

22

standing. The garage is still there, great

23

museum and kids still come through here. There

24

are people, we should ask, who may have been here

25

when they were a micro smidgin.

1

2

MS. HART: Both.

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. GISH: We had asked people and they'll tell me they came here. You can usually tell their age based on was the Planetarium here. No, I just went in and saw the Mummy, there was no programs here. You'd be surprised how many children on Long Island have a memory of the Vanderbilt.

MR. SHILLING: I came through here in elementary school. I grew up in Huntington.

MR. ZOOMB: Children don't carry big wallets at this point.

MR. GISH: No, they don't.

MR. WHITTEN: How do we get them back as adults?

MS. HART: But they grow up.

MR. ZOOMB: It would be nice to get to the point where the museum is at a point where kids could come for free.

MR. GISH: I have suggested that.

MR. ZOOMB: Generate enough revenue so that it's open to all the schools to come for free.

MR. GISH: I would love to be able to do that. You know that the oversight committee made

1

2

us raise the fees just to come.

3

MR. ZOOMB: Well --

4

5

6

7

8

9

10

11

MR. GISH: What our wish list would be, change. That would always be my plan and Carol has always felt that that would be a key element on down the line to be able to make this as accessible as any institution. Your fees are going to be in the buses and your insurance getting here but we'd like to be able do it that way.

12

13

14

15

16

17

18

19

20

21

22

23

24

Whenever we try to establish a weekend, a free weekend or if some of the sponsors, we try to get them to sponsor a weekend or a week, which makes this place open to the public for free. We did that on Veteran's Appreciation Sunday. We tried that for the first time. Veterans and their families got in for free but that's tough because we still have to pay the staff. And Carol will tell me, nice idea, Gish. However, we still got to cover the cost and the bottom line is the County doesn't want to hear you're doing nice things. Maybe later on we can but right now.

25

MR. HORSLEY: In your calculations for

1

2 space, are we looking at the Normandy House as
3 well?

4

MS. HART: We would look at that sure.
5 We're already developing that for the faculty.

6

MR. HORSLEY: We're looking at the bill for
7 the Normandy House. It was an eye opener for
8 several reasons, how much.

9

MR. GISH: Maybe we can go back over there
10 later.

11

MS. HART: One of the reasons we're not
12 there now is that --

13

MR. HORSLEY: That's okay. I just wanted
14 to --

15

MS. HART: I wanted to say we're looking at
16 using the facility. We're not there right now
17 because the gardeners are there right now. And
18 they're master gardeners and they're working on a
19 plan. They would like to put in a Victory garden
20 over there. That would be, it would be
21 historical because going back to the garden from
22 World War I, World War II and other occasions.
23 We are really mindful that if we don't use that
24 area for our mission, beyond offices, if we do
25 garden --

1

2

MR. HORSLEY: Education being part of the mission too. It seems to me that there's room for classrooms in there for some level.

4

5

MR. ZOOMB: I think it would be a prime location for a culinary kitchen.

6

7

MS. HART: There's room for smaller, for a smaller thing. And I think we have to look at some of the things you've mentioned. Clearly there's a lot of academic subjects that would fit in with us. But then there are also newer or other kinds of things, like culinary or tourism and heritage, there's a lot. Tourism is becoming a big --

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. WHITTEN: What I thought when I walked in there, I went over there first, even though there was a big sign out there. I thought we had students here. So I went in there and I met the woman. I walked in and I thought, gees, this would be a fantastic place for, I run the corporate training center as well. We do a lot of corporate training for companies where we do a lot of training around leadership, team building, management, supervision, that would be a great place for a company to come for a day and do

1
2 training. If there was a small kitchen in there,
3 you could have a small food service that may also
4 benefit here or you could have stuff catered and
5 brought in from outside. But that would be a
6 great revenue stream because we don't have to set
7 that based on the contract that we have with
8 faculty with pricing. It's based on market value
9 because we do it as a revenue stream because it's
10 on credit training. That's an area that I was
11 brought in to help grow. And that's what we're
12 trying to do. That place right there.

13 MR. HORSLEY: What better place.

14 MR. GISH: Rather than the Grant Campus.

15 MR. WHITTEN: Why wouldn't you want to go
16 there. You have an hour for lunch, go see the
17 museum. You may have business leaders in here,
18 there's so many opportunities to highlight. And
19 that place, when I walked in there, the only
20 issue was there's not a lot of the parking but
21 they can park --

22 MR. HORSLEY: We can grow parking. Is that
23 on the register?

24 MS. HART: Well, there's issues. There's
25 always parking immediately across the street.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. GISH: It's a residential area. I believe initially when the County acquired that, correct me here, there were limits on the number of?

MS. HART: Of the records of timing, certain promises were made to the neighbors. I don't think it's in writing. We'd have to look into that.

MR. HORSLEY: You don't want to kick up heels.

MR. GISH: It will become an issue, even with our temporary tent, just running events. It does create a problem dealing with sound in the summertime, I'm not going to just quiet that down. That is an issue for us, just in the temporary fashion.

MS. HART: We are a residential area. We have to be mindful of our neighbors.

MR. ZOOMB: You're talking about internal, it's not like a party.

MS. HART: We've certainly looked into using the buildings for that kind of use but where the synergy could come in could clearly, I mean you could try to --

1

2

MR WHITTEN: We know we have the space, we can market it that to the businesses we work with. We come here, you tell us the price to rent, we charge that back to the business, we get them here, we generate revenue, we're training people at this area, which is very attractive. There's a lot of industry from 110 out. I mean, we'd rather come here than to go out to Brentwood.

10

11

MR. HORSLEY: I love that. I think that sounds great.

12

13

MR. WHITTEN: Who wouldn't want to take a class, sit in that class in that building than sit in one of our training rooms which are --

14

15

16

MS. HART: Yes. I think that would maybe be a really good place to start to even look at that. The one problem with the building that exists now is you can't fit more than 20 people, 15 people.

17

18

19

20

21

MR. WHITTEN: I wouldn't do more than 18 to 20.

22

23

MS. HART: Maybe we should go look at it more carefully.

24

25

MR. GISH: Initially we could just bring

1
2 offices to sort of coordinate getting everybody
3 together because here everybody was sort of
4 broken up.

5 MS. HART: The reason we're here today is
6 unusual. We have the gardeners over at Normandy.
7 The Lancaster Room that we often have meetings
8 in, there are Mummy classes in there today. The
9 Planetarium classes were being used. And this
10 normally would have artifacts and be part of our
11 Historic Mansion Tour but because we had our
12 holiday dinner here last Saturday, we have
13 another one this coming Saturday, we had cleared
14 things out for the dinner, so we had the tables
15 and chairs here. That's why we're here.

16 THE WHITTEN: That's good.

17 MR. GISH: I just want to make a point to
18 Neil that we're not just having dinners here.
19 This is for revenue.

20 MR. HORSLEY: I started out right from the
21 beginning talking about how we made so many
22 improvements over the year.

23 MR. ZOOMB: The business development is what
24 I'm talking about.

25 MR. HORSLEY: Yes. I think that's a great

1

2 idea though. I think adds, the value adds to the
3 museum itself. The corporate center and
4 meetings, those are the kind of people who will
5 come back with their wives or husbands.

6 MS. HART: It's wonderful. It's an idea we
7 thought of but we don't have the means and
8 background and experience to move forward.

9 MR. WHITTEN: You need to --

10 MR. HORSLEY: Then you have a partner in the
11 County again.

12 MS. HART: I think that would be a great
13 place to start and for another reason to show
14 that Normandy can be income producing and have a
15 good public function.

16 MR. HORSLEY: As a legislature, that
17 makes --

18 MS. HART: There's great potential so maybe
19 we should look, maybe focus on that.

20 MR. GISH: This was part of his property.
21 That was his house and --

22 MR. WHITTEN: The caretakers --

23 MR. GISH: The caretakers got it.

24 MR. ZOOMB: They bought it separately?

25 MR. GISH: They bought it separately in

1

2

1993 --

3

MR. HORSLEY: So the restrictions on that are basically parking. It's not part of the parks --

5

6

MS. HART: I don't know what's official. We've been planning to do some research on that. It might be on Huntington, we don't know for sure all the restrictions. I know some of the agreements with neighbors but whether or not that, you know.

10

11

12

MR. WHITTEN: This would be daytime or early they can park here? I mean, as long as someone is here to greet them and walk them across the street, they can park here.

13

14

15

16

MS. HART: It's only flat property really. It's three acres and it's flat and it's certainly to put up tents in the summertime for mild use, not for weddings or for music but for a corporate gathering.

17

18

19

20

21

MR. WHITTEN: Fundraising events.

22

23

MR. HORSLEY: Yes, absolutely. Foundations or something like that, as well as your foundation.

24

25

MS. HART: We put in a vegetable garden

1
2 actually this summer and they were hoping it
3 would generate interest and money. It was
4 supposed to, didn't quite work but now they're
5 thinking let's think more educationally and
6 they're putting in the Victory garden and the
7 butterfly garden. We have been working, we have
8 a number of capital projects that are, it doesn't
9 have a CO right now but it's a capital project
10 that we've been talking about is to get us to
11 that point, handicapped bathrooms, handicapped
12 accessibilities. That's in the works.

13 MR. HORSLEY: This is Huntington? It's not
14 an incorporated area?

15 MS. HART: Here, no.

16 MR. WHITTEN: If we're doing something --

17 MR. HORSLEY: We've got friends.

18 MS. HART: We do have money appropriated so
19 it's coming. So that's not too hard. We have
20 another appropriation that is being worked on
21 that will basically, once the last one comes
22 through, the building will be sound in the next
23 year or so. If we could push some of the
24 projects forward, the moneys already there.

25 MR. WHITTEN: I think just from what we've

1
2 talked about today, there is a number of areas
3 that we can start investigating in a
4 collaborative efforts. Some are easier,
5 low-hanging fruit pieces, others we need to
6 investigate. But I don't see any reason why
7 there aren't three or four areas that we can look
8 at, maybe develop a plan of what we think might
9 work, develop the MOU and go from there,
10 realizing that what we're trying to do is
11 maintain the validity of this institution here as
12 the museum and educational facility, bringing in
13 the college as an active partner to see areas we
14 might be able to support you by revenue
15 generation and additional exposure.

16 I think with courses that are business
17 related that are, that we bring companies in,
18 with training in a facility like that, the
19 synergy that it creates is potential donor
20 because you've got business people coming in and
21 out, it's a captive audience. And maybe one of
22 the caveats we have before each class starts,
23 maybe give a five-minute overview of the museum
24 and it gives you an opportunity to pitch the
25 museum. What we used to do at the facility I ran

1

2

before, you got to talk about the whole culture of the environment you are in, people appreciate that a lot more than just showing up at some place, handing out the workbook and let's get to work. Plus the PR this could generate of two community entities.

3

4

5

6

7

8

MR. HORSLEY: Absolutely.

9

10

MR. WHITTEN: Two County entities that are trying to share resources.

11

MR. HORSLEY: Little shop people.

12

13

MR. GISH: I think this is a preliminary meeting. You and I will set up some dates where we could sort of go through and we'll examine this in a much --

14

15

16

17

18

19

20

21

22

23

24

25

MR. WHITTEN: Absolutely. I'm just going to throw something out there. I don't know if this is what you're looking for but I know you have a board of directors. I don't know if they have someone from the college be appointed as a board of director member to show that, I don't know if you want George Gatta to be on or something of that magnitude but it would be an opportunity to create that continued support. If you have someone from that level gets to see it, I'm just

1

2

saying, it might be a good opportunity.

3

4

MS. HART: Legislature appoints our board so we have to look at the code.

5

6

MR. HORSLEY: We've been filling slots lately.

7

MR. GISH: As I've been losing them.

8

MR. HORSLEY: That's not a bad idea.

9

10

11

12

MR. GISH: I don't know what the legal entanglements are but even if ex officio to somebody to have someone sit-in almost like this is going --

13

MR. HORSLEY: Like on oversight.

14

15

16

MR. GISH: If Suffolk Community wanted to come in and participate in the board of functions, I'm not opposed to that.

17

18

MR. WHITTEN: I think it would be a great opportunity to increase that communication.

19

20

MR. HORSLEY: Are we at that level of relationship?

21

22

23

MR. WHITTEN: I think that should happen anyway. Honestly, in my opinion, I think that should happen any way.

24

MR. HORSLEY: Picked by the trustees.

25

MR. WHITTEN: However you do it. I don't

1

2 want --

3 MS. HART: The Legislature actually picks
4 the trustees.5 MR. GISH: It's an odd relationship to the
6 fact that we have a board of trustees and the
7 Legislature chooses who's on the board of
8 trustees, so I don't have that availability. The
9 college chooses --

10 MR. WHITTEN: Right.

11 MR. HORSLEY: -- lost some recently so
12 they're openings?13 MR. GISH: Yes, there are openings. There
14 are openings.15 MR. WHITTEN: There may be key people on
16 campus --17 MS. HART: I don't think there's anything in
18 the code. The code just requires that the person
19 have either a background in education or
20 philanthropy and not be an officer.21 (Whereupon, all parties started speaking at
22 once.)23 MS. HART: Then you can't be an officer in a
24 public party.

25 MR. GISH: I have no problem with that.

1

2 Right now we have with Lynn's resignation 13. We
3 have 13 on the board at present, some more active
4 than others but 13.

5 MS. HART: There's normally 15. All though,
6 I think there should be more according to the
7 code but we have openings with the 15.

8 MR. ZOOMB: I think we have talked about in
9 the past about the people on the board being
10 contributory. There are various ways to be
11 contributory. You don't necessarily need to be
12 contributory in a monetary way.

13 MR. WHITTEN: It doesn't have to be a voting
14 member either, just someone that's --

15 MR. ZOOMB: I have talked in the past with
16 Carol and all that. The people on the board
17 generally, in my experience, are people that
18 contribute in one way, shape or form. Monetary
19 or some perspective. Having someone, say from
20 your perspective that can forge a relationship
21 and come up with ideas and drive ideas on the
22 college side to help the university is a
23 worthwhile organization.

24 MR. WHITTEN: Some of my, I'm on the
25 President's Cabinet so I report to the President

1

2 regularly so I have his ear all the time and
3 that's what we need to have in order to get
4 things done. I've participated in your
5 legislation meetings on every other Wednesday so
6 there is no synergy but --

7

MR. GISH: Let's use this as the first
8 meeting and we'll be in touch, we'll start that
9 today. And you and I will meet and I'll report
10 back to Neil and I'll report back to Wayne on how
11 our progress progresses.

12

MR. HORSLEY: Once you have this meeting and
13 you feel there is a relationship, I'll take care
14 of board member issue.

15

MR. GISH: That's fine with me. I have no
16 problem with that.

17

MR. SHILLING: Good, good.

18

MR. ZOOMB: We guys can get together, put
19 some thoughts together and we can have another
20 meeting and review where you guys think you're
21 at.

22

MR. WHITTEN: We can put together a simple
23 plan of what our goals are.

24

MR. HORSLEY: I think you guys should look
25 at the square footage and stuff like that.

1

2

MR. GISH: That's what we'll do.

3

4

5

MS. HART: We multiuse like crazy here. Our classrooms are where we have birthday parties on the weekends. We do these --

6

7

8

9

10

11

12

MR. HORSLEY: I think you could upgrade your buildings and stuff like that. As you say, the smart classrooms and stuff like that so that the college will want it. I've been in the Carriage House. I remember the overhead projector or something, which I still use by the way when I teach.

13

14

MR. WHITTEN: Still have an overhead with the --

15

MR. HORSLEY: Yes.

16

17

MR. ZOOMB: Certainly support our capital projects.

18

19

MR. SHILLING: That's exactly what I was going to say.

20

21

22

23

24

MR. ZOOMB: Getting the roadway built to go down to the seaplane hanger would certainly be easier to get that capital project through if the seaplane hanger was going to be turned into something that --

25

MR. SHILLING: If you had buildings you

1

2

wanted to make smart classrooms, your

3

relationship with the college, you have access to

4

the --

5

MR. HORSLEY: It's a win/win for both

6

parties.

7

MR. GISH: This facility, when you take a

8

look in the County at the number of museums that

9

are closed from the Long Island Museum to Stony

10

Brook to the East End, Islip parks, this is one

11

of the ones that you can really depend on, get

12

your kids through without knowing they're going

13

to be closed on an odd or even day. I think

14

we've done a good job this year, especially in

15

this --

16

MR. HORSLEY: I agree.

17

MR. GISH: To keep the buses coming through.

18

Because a lot of the districts that still have

19

field trips and that is the one thing we

20

produced, a great education brochure that we

21

produced this year. I dropped it off with you

22

and got it out to every school in Nassau and

23

Suffolk County. But when I met with the

24

superintendents to try to urge them to come, the

25

first thing we had to cut when the State made

1

2 their cuts was field trips. I'm being honest
3 with you.

4 MR. HORSLEY: My wife is in education so I
5 hear it every day.

6 MR. GISH: It's nothing we're doing here
7 that's wrong, it's just the situation and the
8 economy.

9 MR. WHITTEN: Learning costs, cost of travel
10 and gas.

11 MR. GISH: We are getting a few people that
12 would normally head into the City, they're making
13 the right turn and coming to the North Shore, so
14 that's a plus. Shelter Island is not going to
15 the City. They'll be here tomorrow. It's funny,
16 on the legislative end, I think a number of
17 legislators feel that that's Huntington area,
18 that's Centerport, that's where they are. But in
19 reality, when you take a look at the kids that
20 are coming here, like I said tomorrow from
21 Shelter Island, from Franklin Square or from the
22 Catholic schools that will come on their free
23 days, we're open to lot of people in both
24 counties.

25 MR. HORSLEY: I don't see the college any

1

2

way interfering with the kids. That's future
students.

3

4

5

6

7

8

9

10

MR. GISH: Any time we can increase from
elementary to middle and high school, we can
include the college end. I'm a retired history
teacher from happy Hauppauge High for 35 years.
I taught on the college level at Suffolk
Community College. I would like to enhance this
institution's educational contacts.

11

12

13

MR. WHITTEN: Again, we don't want to
interfere with the operation. We want to enhance
it.

14

MR. GISH: We won't let you.

15

MR. WHITTEN: Good.

16

17

18

MR. GISH: I know the college doesn't want
our ground groups problems. You don't want to
have to deal with all the trimming and bushes.

19

20

MR. WHITTEN: Unless we have a landscaping
program.

21

MS. HART: Yes.

22

MR. HORSLEY: Horticulture.

23

24

25

MR. GISH: I'm not apposed to any of those
options, bringing people in to do it. Like I
said, we're looking for interns. We would love

1

2

to be able to have a museum, courses in museum science or museum administration or fill in word you want.

3

4

MS. HART: Tourism.

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MR. WHITTEN: We could put those in simply because they're special topics. We don't have to worry about going through SUNY and New York State Ed. With special topics, it goes through our original committee, guess the dominant and these are easy to offer. It's when we put together a whole program that it takes.

MR. GISH: This would just enhance the problem availability for the college. Things they couldn't do there, they might be able to do here.

MR. HORSLEY: There's nothing on the North Shore.

MR. DIMARTINO: I'd come here to take classes.

MR. GISH: There are a lot of possibilities even with the collections of arts that's here. I mean it is a Gold Coast mansion. It's F. Scott Fitzgerald's A Great Gatsby. It's a place, the literature of the time, it's distinctly possible.

1

2

MR. WHITTEN: I could see a lot of our
English faculty wanting to --

3

4

MR. GISH: That's what I'm saying. A lot of
times destination lectures. What do you do, you
go to a park and read poetry. Let's go outside
today, we'll sit under a tree and read Walt
Whitman. There's a lot of little ones you could
use here.

5

6

7

8

9

10

MR. HORSLEY: The poets of Long Island.

11

MR. SHILLING: Theater programs here.

12

MR. WHITTEN: We have a very strong --

13

MS. HART: Oh, I wanted to mention we have a
living history program here where our weekends
from May through Labor Day, we have performers
that portray servants, they portray --

14

15

16

17

MR. WHITTEN: I was here this summer and
they --

18

19

MR. GISH: They dressed up so this was a
theater.

20

21

MS. HART: Museum theater is a whole other
growing. We do museum theater in different ways
but that's another way that --

22

23

24

MR. SHILLING: Have you had the Shakespeare
festival?

25

1

2

MR. GISH: Shakespeare in the Courtyard.

3

4

MS. HART: Yes. Every summer we have
Shakespeare in the Courtyard.

5

MR. GISH: The complete works.

6

MR. HORSLEY: How big is the parking here?

7

8

MS. HART: I think we fit 220 cars,
something like that. And we probably could fit,
if we cleaned things up --

9

10

11

12

MR. GISH: On Rotary nights, they can fill
it with a few more but they will park outside
along the fence line.

13

14

MS. HART: On our busy days, we park outside
of the fence.

15

16

MR. GISH: The Rotary has a major
fundraising function.

17

MR. HORSLEY: Huntington Rotary.

18

19

MR. GISH: This has been their site for
their --

20

MS. HART: I think it's 1,200 people.

21

22

23

24

25

MR. GISH: That's their one major function
that they run. That's when our tent is up and
they put up an additional tent and so it is a
major night. And they actually move people up by
tram from the beach area.

1

2

MS. HART: They park at the beach. We can accommodate, I forget the exact number of spots we have.

4

5

MR. HORSLEY: We have enough parking for classes and things like that?

6

7

MS. HART: Yes. Generally, maybe six times a year we don't have enough parking and we park on the street, on car show days and when we're free we run out of parking, we park up and down but for the most part --

10

11

12

MR. WHITTEN: We would look at the utilization. You could tell us when is the best time.

13

14

15

MR. GISH: That's all, it's preliminary and we can work on that.

16

17

MR. WHITTEN: If we're looking at more traditional semester cases, the summer is our lightest semester any way.

18

19

20

MS. HART: During the fall is --

21

MR. WHITTEN: If it's an evening course, I don't think it's going to interfere with much.

22

23

MR. GISH: I would like to better utilize this in the evening.

24

25

MS. HART: We have the facilities we pay

1

2

for, everything we pay for.

3

4

MR. GISH: Security is here 24 hours a day, it has to be. So the availability of getting in for evening classes would still be there.

5

6

7

MR. WHITTEN: So the next step then would be for us to set up a meeting.

8

9

MR. GISH: We'll meet. I think we should, one, do a tour initially.

10

11

MR. WHITTEN: Sure.

12

13

MR. GISH: Maybe you and I and Carol can sneak down and anybody from the college who wants to come.

14

15

MR. WHITTEN: Yes.

16

17

MR. GISH: Or you and I can do it and then the head people if we think we need to have outside comments, we'll report back.

18

19

MR. WHITTEN: Why don't we sit down first and come up with a scope of having all the objectives answered prior to going --

20

21

22

MR. GISH: I think that's good, outline what we can do.

23

24

25

MS. HART: If we have time before you go, we could go over to Normandy House because that's one of things in our planning for next year.

1

2

MR. WHITTEN: I have to be in Riverhead. I
got excused from jury duty this morning to be
here.

4

5

MR. HORSLEY: What time do you have to be
there?

6

7

MR. WHITTEN: I have to be back there by
1:20 so if I leave here by 12:15 I'll be all
right.

8

9

10

MR. GISH: We can do 10 minutes at Normandy.

11

MR. HORSLEY: Let's go over there now.

12

MR. GISH: We're done.

13

(Time noted: 11:49 a.m.)
